levels, and prohibitions on certain food additives.

Standards-related Measures:
Standards-related measures comprise standards, technical regulations, and conformity assessment procedures, such as mandatory process or design standards, labeling or registration requirements, and testing or certification procedures. Standards-related measures can be applied not only to industrial products but to agricultural products as well, such as food nutrition labeling schemes and food quality or identity requirements.

For further information on SPS and standards-related measures and additional detail on the types of comments that would assist USTR in identifying and addressing significant trade-restrictive SPS and standardsrelated measures, please see "Supporting & Related Materials" under dockets USTR-2012-0032 and USTR-2012–0033 at www.regulations.gov. The previously released SPS and TBT Reports also contain extensive information on SPS and standardsrelated measures that commenters may find useful in preparing comments in response to this notice.

In responding to this notice with respect to the two reports, commenters should place particular emphasis on any practices that may violate U.S. trade agreements. The TPSC is also interested in receiving new or updated information pertinent to the barriers covered in the 2012 SPS and TBT Reports as well as information on new barriers. If USTR does not include in the 2013 SPS or TBT Reports information that USTR receives pursuant to this notice, USTR will maintain the information for potential use in future discussions or negotiations with trading partners.

Estimate of Increase in Exports: Each comment should include an estimate of the potential increase in U.S. exports that would result from removing any foreign trade barrier the comment identifies, as well as a description of the methodology the commenter used to derive the estimate. Estimates should be expressed within the following value ranges: Less than \$5 million; \$5 to \$25 million; \$25 million to \$50 million; \$50 million to \$100 million; \$100 million to \$500 million: or over \$500 million. These estimates will help USTR conduct comparative analyses of a barrier's effect over a range of industries.

Requirements for Submissions: Commenters providing information on SPS or standards-related measures in more than one country should, whenever possible, provide a separate submission for each country. In order to ensure the timely receipt and consideration of comments, USTR strongly encourages commenters to make on-line submissions, using the http://www.regulations.gov Web site. Comments should be submitted under one of the following dockets (depending on the subject of the comment):

SPS Measures: USTR-2012-0032. Standards-related Measures: USTR-2012-0033.

To find these dockets, enter the pertinent docket number in the "Enter Keyword or ID" window at the http://www.regulations.gov home page and click "Search." The site will provide a search-results page listing all documents associated with that docket number. Find a reference to this notice by selecting "Notices" under "Document Type" on the search-results page, and click on the link entitled "Submit a Comment." (For further information on using the www.regulations.gov Web site, please consult the resources provided on the Web site by clicking on the "Help" tab.)

The http://www.regulations.gov Web site provides the option of making submissions by filling in a comments field, or by attaching a document. USTR prefers submissions to be provided in an attached document. If a document is attached, please identify the name of the country to which the submission pertains in the "Comments" field. For example: "See attached comment on SPS measures for (name of country)" or "See attached comment on standards-related measures for (name of country)". USTR prefers submissions in Microsoft Word (.doc) or Adobe Acrobat (.pdf).

For any comments submitted electronically containing business confidential information, the file name of the business confidential version should begin with the characters "BC". The top of any page containing business confidential information must be clearly marked "BUSINESS CONFIDENTIAL". Any person filing comments that contain business confidential information must also file in a separate submission a public version of the comments. The file name of the public version of the comments should begin with the character "P". The "BC" and "P" should be followed by the name of the person or entity submitting the comments. If a comment contains no business confidential information, the file name should begin with the character "P", followed by the name of the person or entity submitting the comments.

Please do not attach separate cover letters to electronic submissions; rather, include any information that might appear in a cover letter in the comments themselves. Similarly, to the extent possible, please include any exhibits, annexes, or other attachments in the same file as the submission itself, not as separate files.

Public Inspection of Submissions

Comments will be placed in the docket and open to public inspection except confidential business information exempt from public inspection. Comments may be viewed on the http://www.regulations.gov Web site by entering the relevant docket number in the search field on the home page.

Douglas M. Bell,

Chair, Trade Policy Staff Committee.
