The OCC is proposing to extend OMB approval of the following information collection:

Title of Information Collection:
Funding and Liquidity Risk Management.

OMB Control No.: 1557-0244.

Type of Review: Extension, without revision, of a currently approved collection.

Description: The Interagency Policy Statement on Funding and Liquidity Risk Management¹ (Policy Statement) summarizes the principles of sound liquidity risk management that the agencies have issued in the past² and, where appropriate, harmonizes these principles with the international statement issued by the Basel Committee on Banking Supervision titled "Principles for Sound Liquidity

Risk Management and Supervision."³ The Policy Statement emphasizes supervisory expectations for all depository institutions including banks, savings associations, and credit unions.

Section 14 of the Policy Statement provides that financial institutions should consider liquidity costs, benefits, and risks in strategic planning and budgeting processes. Significant business activities should be evaluated for liquidity risk exposure as well as profitability. More complex and sophisticated financial institutions should incorporate liquidity costs, benefits, and risks in the internal product pricing, performance measurement, and new product approval process for all material business lines, products, and activities. Incorporating the cost of liquidity into these functions should align the risk-taking incentives of individual business lines with the liquidity risk exposure their activities create for the institution as a whole. The quantification and attribution of liquidity risks should be explicit and transparent at the line management level, and should include consideration of how liquidity would be affected under stressed conditions.

Section 20 of the Policy Statement requires that liquidity risk reports provide aggregate information with sufficient supporting detail to enable management to assess the sensitivity of the institution to changes in market conditions, its own financial performance, and other important risk factors. Institutions also should report on the use of and availability of government support, such as lending and guarantee programs, and implications on liquidity positions, particularly since these programs are generally temporary or reserved as a source for contingent funding.

Affected Public: Businesses or other for-profit.

Estimated Burden:

The OCC estimates the burden of this collection of information on national banks and Federal savings associations as follows:

Estimated Number of Respondents: 1,833 total (13 large (over \$100 billion in assets), 47 mid-size (\$10-\$100 billion), 1,773 small (less than \$10 billion)).

Estimated Burden under Section 14: 360 hours per large respondent, 120 hours per mid-size respondent, and 40 hours per small respondent.

Estimated Burden under Section 20: 2 hours per month.

Total Estimated Burden Hours: 125,232 hours.

Comments: Comments submitted in response to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on:

(a) Whether the information collections are necessary for the proper performance of the functions of the OCC, including whether the information has practical utility;

(b) The accuracy of the OCC's estimate of the information collection burden;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of information collections on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of the services necessary to provide the required information.
