

Marine Fisheries Service (NMFS). Under this stewardship role, the Secretary was given certain regulatory authorities to ensure the most beneficial uses of these resources. One of the regulatory steps taken to carry out the conservation and management objectives is to collect information from users of the resource.

As regional Fishery Management Councils develop specific Fishery Management Plans (FMP), the Secretary has promulgated rules for the issuance of permits to individuals and organizations participating in Federally controlled fisheries in order to: (1) Register fishermen, fishing vessels, fish dealers and processors, (2) List the characteristics of fishing vessels and/or dealer/processor operations, (3) Exercise influence over compliance (e.g. withhold issuance pending collection of unpaid penalties), (4) Provide a mailing list and email list for the dissemination of important information to the industry, (5) Register participants to be considered for limited entry, and (6) Provide a universe for data collection samples. Identification of the participants, their gear types, vessels, and expected activity levels is an effective tool in the enforcement of fishery regulations.

Limited access fishing permits, where entry is reviewed during a one-time application period, place size, tonnage, and horsepower restrictions on the ability of a vessel owner to upgrade or replace their vessel. If a vessel owner wishes to upgrade any of the specifications of his/her vessel such as length overall, net tonnage, gross tonnage, horsepower, or vessel fish hold capacity, he/she must submit, in writing, a request for a vessel upgrade. A request, in writing, also must be made in order to replace one limited access permitted vessel with another as vessel size restrictions are limited to 10-percent above the baseline length overall, gross, and net tonnage, 20-percent above the baseline horsepower, and 10-percent above the vessel hold capacity measurement for limited access vessels with Tier 1 or 2 Atlantic mackerel permits.

Vessels with particular permits are also required to use an electronic vessel monitoring system (VMS) to declare their intent to fish before starting a particular trip, change their intent to fish during a trip, and to report real-time catch and discard information. While vessels are also required to report catch information weekly or monthly depending on their permit through vessel trip reports (VTRs) (VTR collection approved in OMB Control No. 0648-0212), it is often necessary to have

daily catch reporting in order to have a real-time understanding of the operation of the fishery. Real time catch reporting is especially important for high volume fisheries, where large amounts of fish are landed in short periods of time, so that the fishery can be shut down when approaching the annual, regional, or seasonal quota.

Vessels are also required to request, in writing, participation in any of the various exemption programs offered in the Northeast region. Exemption programs may allow a vessel to fish in an area that is limited to vessels of a particular size, using a certain gear type, or fishing for a particular species. Vessels are also required to request gillnet and lobster tags through the Northeast region permit office when using gillnet gear or lobster traps. Lastly, vessel owners that own multiple vessels, but would like to request communication from NMFS be consolidated into one mailing (and not separate mailings for each vessel), may request the single letter vessel owner option to improve efficiency of their business practice.

This revision/extension removes several requirements from this collection, either because they are no longer valid, or because they have been moved to other information collections.

Affected Public: Business or other for-profit organizations.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Business and Professional Classification Report survey (SQ-CLASS) collects information on new businesses to obtain proper industry classification for use in economic surveys conducted by the U.S. Census Bureau. The survey, conducted quarterly, samples businesses with newly assigned Employer Identification Numbers (EINs) from the Internal Revenue Service (IRS). Businesses can only be selected once for the survey. The SQ-CLASS form collects data about a business in such areas as primary business activity, company structure, size, and business operations. This information is used to update the sampling frame for current business surveys, which ensures high quality economic estimates. Additionally, by ensuring proper industry classification,

this survey reduces respondent burden for the five-year Economic Census, as businesses will be mailed Economic Census forms specifically tailored to their industry.

We plan a few changes to the form. Most of the changes to the questionnaire will be aesthetic. The questionnaire will be redeveloped in the Census Bureau's standard form design software. This will give it the look of the other Census Bureau's economic surveys and the Economic Census. Minimal changes will be made to the wording and organization of existing questions and instructions to ensure consistency across the economic surveys and/or the Economic Census.

II. Method of Collection

Information is collected by Internet, mail, fax, and telephone follow-up.

III. Data

OMB Number: 0607-0189.

Form Number: SQ-CLASS.

Type of Review: Regular.

Affected Public: Businesses and other organizations in the United States.

Estimated Number of Respondents: 52,000 business firms.

Estimated Time per Response: 13 minutes.

Estimated Total Annual Burden Hours: 11,267 hours.

Estimated Total Annual Cost: \$340,489.

Respondent's Obligation: Mandatory.

Legal Authority: Title 13 U.S. Code 182 and 193.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.
