B. Regulatory History and Information

The Coast Guard published an NPRM entitled "Transportation Worker Identification Credential (TWIC)—Reader Requirements" on March 22, 2013 (78 FR 17782) that proposes to require owners and operators of certain vessels and facilities regulated by the Coast Guard to use electronic readers designed to work with the Transportation Worker Identification Credential (TWIC) as an access control measure. The NPRM also proposes additional requirements associated with electronic TWIC readers, including recordkeeping requirements for those owners and operators required to use an electronic TWIC reader, and security plan amendments to incorporate TWIC requirements. The TWIC program, including the proposed TWIC reader requirements in the proposed rule, is an important component of the Coast Guard's multi-layered system of access control requirements and other measures designed to enhance maritime security. All comments on this NPRM were originally due on May 21, 2013.

C. Background and Purpose

The Coast Guard believes that the public would benefit from additional time to provide comments on the proposed rule and analysis. For that reason, we are extending the comment period for a period of 30 days. Comments on the NPRM will now be accepted until June 20, 2013.
