

EIS. In addition, the wind energy portion of the project would adhere to BLM wind energy development program policies and best management practices. Searchlight will abide by the Biological Opinion issued by the U.S. Fish and Wildlife Service and as conditioned by BLM in its right-of-way authorization for the proposed Project. Western will abide by the Biological Opinion as it pertains to Western's switching station and as conditioned by BLM in its right-of-way authorization to Western.

In compliance with the National Historic Preservation Act, BLM has executed a Programmatic Agreement with the Nevada State Historic Preservation Office and Searchlight (as an invited signatory). Western is a concurring party to the Programmatic Agreement.

For Western's proposed switching station, Western requires its construction contractors to implement standard environmental protection provisions. These provisions are provided in Western's Construction Standard 13 (included as an appendix in the Final EIS) and will be applied to the proposed switching station. In addition, specific mitigation measures for the switching station are addressed in the Final EIS and BLM's Record of Decision (ROD), and include requirements for site environmental clearances prior to construction, desert tortoise fencing around the switching station and preparation of a worker environmental awareness program per the Biological Opinion issued for the proposed Project, use of flat tone colors for the switching station intended to blend with the surrounding environment, developing a Memorandum of Understanding to address mitigation for the switching station, and surveying the boundaries of the switching station.

With this decision, Western is adopting the specific mitigation measures that apply to its action and will issue a Mitigation Action Plan before any construction takes place. The plan will address the adopted mitigation measures. When completed, the Mitigation Action Plan will be made available to the public. The mitigation measures in the Final EIS and the BLM ROD reflect all practicable means to avoid or minimize environmental harm from the proposed Project and Western's proposed action.

Comments on the Final EIS

The National Park Service provided comments on the Final EIS to the BLM in a letter dated January 10, 2013, requesting the inclusion of additional mitigation addressing the visual impacts

of Western's proposed switching station. In response, the BLM has added mitigation in its ROD that includes developing a Memorandum of Understanding to address mitigation of the switching station. This mitigation will be incorporated into BLM's right-of-way authorization for the switching station. Western has adopted this mitigation and will abide by mitigation stipulations provided by BLM in its right-of-way authorization for the switching station.

The National Parks Conservation Association (Association) submitted comments on the Final EIS to the BLM in a letter dated January 14, 2013. The Association noted that its comments on the Draft EIS were omitted from the Final EIS. Its comments on the Draft EIS noted that the proposed switching station, an industrial facility with chain link fence, would be built next to Lake Mead National Recreation Area's newly constructed Cottonwood Cove Visitor Entrance Station, negatively impacting visitor experience to the National Recreation Area. The Association also questioned the location of the proposed switching station in relation to the Piute-Eldorado Valley Area of Critical Environmental Concern and a 100-year floodplain. Western has adopted BLM's Final EIS errata addressing the Association's comments on the Draft EIS.

In its January 14, 2013, letter, the Association also requested that the siting of the switching station along with the station's construction methods and materials be addressed by convening a meeting that includes high-level representatives from Duke Energy, Western, the National Park Service, BLM, and the Association. BLM has added mitigation to its ROD to address the visual impacts of the switching station. Western has adopted this mitigation and will abide by mitigation stipulation provided by BLM in its right-of-way authorization.

The U.S. Environmental Protection Agency, the Nevada Department of Wildlife, the Desert Conversation Program, an individual, and an official of Save the Eagles International also provided comments on the Final EIS. However, none of these comments involved Western's participation or its proposed switching station.

Based on a review of the comments provided on the Final EIS related to Western's switching station, Western has determined that the comments do not present any significant new circumstances or information relevant to environmental concerns and bearing on the Project or its impacts, and a Supplemental EIS is not required.

Decision

Western's decision is to allow Searchlight's request for interconnection to Western's transmission system at its Davis-Mead transmission line, and to construct, own, and operate a new switching station.² Western's decision to grant this interconnection request satisfies the agency's statutory mission and Searchlight's objectives while minimizing harm to the environment. Full implementation of this decision is contingent upon Searchlight obtaining all other applicable permits and approvals as well as executing an interconnection agreement in accordance with Western's Tariff.

This decision is based on the information contained in the Searchlight Wind Energy Project Final EIS, comments received on Draft EIS but not specifically addressed in the Final EIS, and comments received on the Final EIS. This ROD was prepared pursuant to the requirements of the Council on Environmental Quality Regulations for Implementing NEPA (40 CFR parts 1500–1508) and DOE's Procedures for Implementing NEPA (10 CFR part 1021).

Dated: May 6, 2013.

Mark A. Gabriel,
Administrator.

FEDERAL ELECTION COMMISSION

Sunshine Act Meetings

AGENCY: Federal Election Commission.

DATE & TIME: Tuesday, May 21, 2013 at 10:00 a.m.

PLACE: 999 E Street NW., Washington, DC.

STATUS: This meeting will be closed to the public.

ITEMS TO BE DISCUSSED:

Compliance matters pursuant to 2 U.S.C. 437g.

Audits conducted pursuant to 2 U.S.C. 437g, 438(b), and Title 26, U.S.C.

Matters concerning participation in civil actions or proceedings or arbitration.

Internal personnel rules and procedures or matters affecting a particular employee.

* * * * *

² On November 16, 2011, DOE's Acting General Counsel restated the delegation to Western's Administrator all the authorities of the General Counsel respecting environmental impact statements.

PERSON TO CONTACT FOR INFORMATION:
Judith Ingram, Press Officer, Telephone:
(202) 694-1220.

Shelley E. Garr,

Deputy Secretary of the Commission.
