

Conservation, Bureau of Environment, Air Pollution Control Division, on July 12, 2012. This revision consists of updates to transportation conformity criteria and procedures related to interagency consultation and enforceability of certain transportation-related control and mitigation measures. The intended effect is to update the transportation conformity criteria and procedures in the Tennessee SIP. This action is being taken pursuant to section 110 of the Clean Air Act. In the final rules section of this issue of the **Federal Register**, EPA is approving the State's SIP revision as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this rule, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period on this document. Any parties interested in commenting on this document should do so at this time.

DATES: Written comments must be received on or before June 17, 2013.

Endangered and Threatened Wildlife; 90-Day Finding on a Petition To List Iliamna Lake Seals as a Threatened or Endangered Species

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of 90-day petition finding; request for information.

SUMMARY: We, NMFS, announce a 90-day finding on a petition to list the Pacific harbor seals in Iliamna Lake (*Phoca vitulina richardii*) as threatened or endangered under the Endangered Species Act (ESA). We find that the petition presents substantial scientific or commercial information indicating

that the petitioned action may be warranted. Therefore, we are initiating a status review of the harbor seals in Iliamna Lake to determine if listing under the ESA is warranted. To ensure this status review is comprehensive, we solicit scientific and commercial information regarding this species.

DATES: Information and comments must be received by July 16, 2013.

ADDRESSES: You may submit comments on this document, identified by FDMS Docket Number NOAA-NMFS-2012-0236 by any of the following methods:

SUPPLEMENTARY INFORMATION:

ESA Statutory, Regulatory, and Policy Provisions

Section 4(b)(3)(A) of the ESA of 1973, as amended (16 U.S.C. 1531 *et seq.*) requires that, to the maximum extent practicable, within 90 days of the receipt of a petition to list a species as threatened or endangered, the Secretary of Commerce (Secretary) make a finding as to whether that petition presents substantial scientific or commercial information indicating that the petitioned action may be warranted, and promptly publish such finding in the **Federal Register** (16 U.S.C. 1533(b)(3)(A)).

Joint ESA-implementing regulations between NMFS and the U.S. Fish and Wildlife Service (USFWS) define "substantial information" in the context of reviewing a petition to list, delist, or reclassify a species as the amount of information that would lead a reasonable person to believe that the measure proposed in the petition may be warranted. When evaluating whether substantial information is contained in a petition, the Secretary must consider whether the petition: (i) Clearly indicates the administrative measure recommended, and gives the scientific and any common name of the species involved; (ii) contains detailed narrative justification for the recommended measure, describing, based on available information, past and present numbers and distribution of the species involved and any threats faced by the species; (iii) provides information regarding the status of the species over all or a significant portion of its range; and (iv) is accompanied by appropriate supporting documentation in the form of bibliographic references, reprints of pertinent publications, copies of reports or letters from authorities, and maps (50 CFR 424.14(b)(2)).

When we find that substantial information in a petition indicates the petitioned action may be warranted (a "positive 90-day finding"), we are required to promptly commence a review of the status of the species concerned (a "status review"), which includes conducting a comprehensive review of the best available scientific and commercial information. Within 12 months of receiving the petition, we must conclude the review with a finding as to whether, in fact, the petitioned action is warranted. Because the finding
