Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call 404–639–7570 or send comments to Kimberly S. Lane, 1600 Clifton Road, MS–D74, Atlanta, GA 30333 or send an email to omb@cdc.gov.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Written comments should be received within 60 days of this notice.

Proposed Project

National Healthcare Safety Network (NHSN) (OMB No. 0920–0666), exp. 12/

31/2015—Revision—National Center for Emerging and Zoonotic Infectious Diseases (NCEZID), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The National Healthcare Safety Network (NHSN) is a system designed to accumulate, exchange, and integrate relevant information and resources among private and public stakeholders to support local and national efforts to protect patients and promote healthcare safety. Specifically, the data is used to determine the magnitude of various healthcare-associated adverse events and trends in the rates of these events among patients and healthcare workers with similar risks. The data will be used to detect changes in the epidemiology of adverse events resulting from new and current medical therapies and changing risks. The NHSN consists of six components: Patient Safety, Healthcare Personnel Safety, Biovigilance, Long-Term Care Facility (LTCF), Dialysis, and Outpatient Procedure.

The new Dialysis Component was developed in order to separate reporting of dialysis events from the Patient Safety Component. The new component will tailor the NHSN user interface for dialysis users to simplify their data entry and analyses processes as well as provide options for expanding the Dialysis Component in the future to include dialysis surveillance in settings other than outpatient facilities.

The new Outpatient Procedure Component was developed to gather data on the impact of infections and other outcomes related to outpatient procedures that are performed in settings such as Ambulatory Surgery Centers (ASCs), Hospital Outpatient Departments (HOPDs), and physicians' offices. Three event types will be monitored in this new component: Same Day Outcome Measures, Prophylactic Intravenous (IV) Antibiotic Timing, and Surgical Site Infections (SSI).

This revision submission includes two new NHSN components and their corresponding forms. The Dialysis Component consists of changes to three previously approved forms and the addition of four new forms. These new forms include component specific monthly reporting plan, prevention process measures monthly monitoring, patient influenza vaccination, and patient influenza vaccination denominator forms. The Outpatient Procedure Component consists of four new forms: component specific annual survey, monthly reporting plan, event, and monthly denominators and summary forms.

Further, the breadth of organism susceptibility data required on all of the healthcare-associated infection (HAI) report forms (i.e., BSI, UTI, SSI, PNEU (VAP and VAE), DE, LTUTI, and MDRO Infection Surveillance) has been reduced for the purposes of streamlining, simplification, and removing undue burden where possible. Significant changes were made to the NHSN Biovigilance Component forms as a result of a subject matter expert and stakeholder working groups. This includes the removal of the monthly incident summary form. A brand new form was added (Form 57.600—State Health Department Validation Record) to collect aggregate validation results that will be gathered by state health departments when conducting facility-level validation of NHSN healthcare-associated infection (HAI) data within their jurisdictions using the CDC/NHSN Validation Guidance and Toolkits.

Additionally, minor revisions have been made to 17 other forms within the package to clarify and/or update surveillance definitions.

The previously approved NHSN package included 48 individual collection forms; the current revision request adds nine new forms and removes one form for a total of 56 forms. The reporting burden will increase by 542,123 hours, for a total of 4,104,776 hours.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form number and name	Number of respondents	Number of responses per respondent	Average burden per response (in hrs.)	Total burden (in hrs.)
Registered Nurse (Infection Preventionist).	57.100: NHSN Registration Form	2,000	1	5/60	167

Administration for Children and Families

Submission for OMB Review; Comment Request

Title: Personal Responsibility Education Program (PREP) Multi-Component Evaluation—Data Collection

Related to the Performance Analysis Study and the Impact and the In-depth Implementation Study.

OMB No.: 0970-0398.

Description: The Office of Data Analysis, Research, and Evaluation (HHS/ACF/ACYF/ODARE) in the Administration for Children, Youth and Families (ACYF) and the Office of Planning, Research, and Evaluation (HHS/ACF/OPRE) in the Administration for Children and Families (ACF) propose a data collection activity as part of the Personal Responsibility Education Program (PREP) Multi-Component Evaluation. The goals of the PREP Multi-Component Evaluation are to document how PREP programs are designed and implemented in the field,

collect performance measure data for PREP programs, and assess the effectiveness of selected PREP-funded programs.

The evaluation includes three primary interconnected components or “studies:”

1. The Impact and In-depth Implementation Study (IIS)
2. The Design and Implementation Study (DIS)
3. The Performance Analysis Study (PAS)

This proposed information collection activity includes: (a) All measures for the PAS for Competitive PREP grantees; (b) follow-up measures for the IIS impact analysis; and (c) measures for the IIS in-depth implementation
