NUCLEAR REGULATORY COMMISSION

[Docket No. NRC-2013-0162]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of pending NRC action to submit an information collection request to the Office of Management and Budget (OMB) and solicitation of public comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) invites public comment about our intention to request the OMB's approval for renewal of an existing information collection that is summarized below. We are required to publish this notice in the **Federal Register** under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. *The title of the information collection:* Part 21 of Title 10 of the *Code of Federal Regulations* (10 CFR), "Reporting of Defects and Noncompliance."

2. *Current OMB approval number:* 3150-0035.

3. *How often the collection is required:* On occasion, as defects and noncompliance are reportable as they occur.

4. *Who is required or asked to report:* Individual directors and responsible officers of firms constructing, owning,

operating, or supplying the basic components of any facility or activity licensed under the Atomic Energy Act of 1954, as amended, or the Energy Reorganization Act of 1974, as amended, to report immediately to the NRC the discovery of defects in basic components or failures to comply that could create a substantial safety hazard.

5. *The number of annual respondents:* 350.

6. *The number of hours needed annually to complete the requirement or request:* 34,705 hours (9,420 hours reporting + 25,190 hours recordkeeping + 95 hours third-party disclosure).

7. *Abstract:* The 10 CFR Part 21 regulation requires each individual, corporation, partnership, commercial grade dedicating entity, or other entity subject to the regulations in this part to adopt appropriate procedures to evaluate deviations and failures to comply to determine whether a defect exists that could result in a substantial safety hazard. Depending upon the outcome of the evaluation, a report of the defect must be submitted to the NRC. Reports submitted under 10 CFR Part 21 are reviewed by the NRC staff to determine whether the reported defects or failures to comply in basic components at the NRC licensed facilities or activities are potentially generic safety problems. These reports have been the basis for the issuance of numerous NRC Generic Communications that have contributed to the improved safety of the nuclear industry. The records required to be maintained in accordance with 10 CFR Part 21 are subject to inspection by the NRC to determine compliance with the subject regulation.

Submit, by October 15, 2013, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

2. Is the burden estimate accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?
