SUPPLEMENTARY INFORMATION:

A. Basis and Purpose

On June 11, 2013, we published a temporary deviation entitled "Drawbridge Operation Regulations; Reynolds Channel, Lawrence, NY", in the **Federal Register** (78 FR 34893). The temporary deviation concerned was for the Atlantic Beach Bridge, across Reynolds Channel, mile 0.4, at Lawrence, New York. The owner of the bridge, Nassau County Bridge Authority, requested a temporary deviation for 176 days to facilitate electrical and structural rehabilitation at the bridge. This deviation from the operating regulations was authorized under 33 CFR 117.35.

B. Cancellation

Under the temporary deviation published on June 11, 2013, (78 FR 34893) the draw of the Atlantic Beach

Bridge at mile 0.4, across Reynolds Channel was required to operate as follows:

(1) From June 9, 2013 through September 30, 2013, Monday through Friday, the draw may operate a single span on signal, every two hours, on the even hour, between 6 a.m. and 8 p.m. From 8 p.m. through 6 a.m. the draw may operate a single span on signal. On weekends and holidays from Friday at 8 p.m. through Monday at 6 a.m. the bridge shall open both spans every hour on the hour.

(2) From October 1, 2013 through December 1, 2013, the bridge shall operate a single span on signal at 6 a.m., 12 p.m., 4 p.m., and 8 p.m. and at any time between 8 p.m. and 6 a.m. The draw shall open both spans at all times for commercial vessel traffic after at least a 48 hour advance notice is given by calling the number posted at the bridge.

The bridge owner recently advised the Coast Guard that six, five hour, bridge closures would be necessary in order to facilitate the completion of the electrical and structural rehabilitation at the bridge. These closures cannot occur under the current temporary deviation.

As a result, the Coast Guard is cancelling the temporary deviation published on June 11, 2013 in the **Federal Register** (78 FR 34893) and will publish a new temporary deviation that will include the six, five hour, bridge closures.

Dated: August 29, 2013.

SUPPLEMENTARY INFORMATION:

A. Background

On October 4, 2013 fireworks will be launched from a barge located in Shallowbag Bay in Manteo, North Carolina as part of the Outer Banks Bluegrass Festival. The temporary safety zone created by this rule is necessary to ensure the safety of vessels and spectators from hazards associated with the fireworks display. Such hazards include obstructions to the waterway that may cause death, serious bodily harm, or property damage, as well as the accidental discharge of fireworks, dangerous projectiles, and falling hot embers or other debris. Establishing a safety zone to control vessel movement around the location of the launch area will help ensure the safety of persons and property in the vicinity of this event and help minimize the associated risks.

B. Need for Correction

The Coast Guard published a document in the **Federal Register** on July 5, 2013, for this temporary safety zone (78 FR 40394). In that document it was incorrectly mentioned to add temporary § 165.T05-0494. The correct entry should have read to add § 165.T05-0330. This document, and the List of Subjects below, corrects that discrepancy.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, and Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

(c) *Regulations.* (1) The general regulations contained in § 165.23 of this part apply to the area described in paragraph (b) of this section.

(2) Persons or vessels requiring entry into or passage through any portion of the safety zone must first request authorization from the Captain of the Port, or a designated representative, unless the Captain of the Port previously announced via Marine Safety Radio Broadcast on VHF Marine Band Radio channel 22 (157.1 MHz) that this regulation will not be enforced in that portion of the safety zone. The Captain of the Port can be contacted at telephone number (910) 343-3882 or by radio on VHF Marine Band Radio, channels 13 and 16.
