Abstract: Section 8(e) of the Toxic Substances Control Act (TSCA) requires that any person who manufactures, imports, processes or distributes in commerce a chemical substance or mixture and which obtains information that reasonably supports the conclusion that such substance or mixture presents a substantial risk of injury to health or the environment must immediately inform EPA of such information. EPA routinely disseminates TSCA section 8(e) data it receives to other Federal agencies to provide information about newly discovered chemical hazards and risks. This information collection addresses the burden associated with industry reporting of such notifications. The respondent may claim all or part of a notice confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA and 40 CFR Part 2.

Form Numbers: None.

Respondents/affected entities: Entities potentially affected by this action are companies that manufacture, process, import or distribute in commerce a chemical substance or mixture and that obtain information that reasonably supports the conclusion that such substance or mixture presents a substantial risk of injury to health or the environment.

Respondent's obligation to respond: mandatory; see 15 USC 2607(e).

Estimated number of respondents: 555 (total).

Frequency of response: On occasion.

Total estimated burden: 19,659 hours per year. Burden is defined at 5 CFR 1320.03(b).

Total estimated burden cost: \$1,366,491 per year, includes \$0 annualized capital or operation and maintenance costs.

Changes in the Estimates: There is a decrease of 10,856 hours in the total

estimated respondent burden compared with the ICR currently approved by OMB. This decrease represents changes in the number of estimated submissions based on EPA's recent experience with TSCA section 8(e) notices plus the effects of optional electronic reporting. This change involves both a program change (electronic reporting) and an adjustment. The Supporting Statement provides additional detail concerning the change in burden estimate.

Dated: September 19, 2013.

Acting Director, Collection Strategies
Division.

Abstract: The NESHP for Boat Manufacturing (40 CFR Part 63, Subpart VVVV) covers resin and gel coat operations at fiberglass boat manufacturers, paint and coating operations at aluminum boat manufacturers, and carpet and fabric adhesive operations at all boat manufacturers. Owners or operators of boat manufacturing facilities are required to submit initial notification, performance tests, and periodic reports. Respondents are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Semiannual reports are also required. These notifications, reports, and records are essential in determining compliance; and are required, in general, of all sources subject to NESHP.

Form Numbers: None.

Respondents/affected entities: Boat manufacturing.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart VVVV).

Estimated number of respondents: 144 (total).

Frequency of response: Initially, quarterly, and semiannually.

Total estimated burden: 23,543 hours (per year). "Burden" is defined at 5 CFR 1320.3(b).

Total estimated cost: \$2,303,583 (per year), includes \$800 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in labor hours in this ICR compared to the previous ICR. This is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden. However, there is an adjustment increase in the respondent burden costs due to an increase in labor rate. This ICR uses updated labor rates from the Bureau of Labor Statistics to calculate burden costs.

Acting Director, Collection Strategies
Division.
