

J.K. submitted information with its petition intended to demonstrate that non-U.S. certified 2011–2012 BMW S1000RR motorcycles, as originally manufactured, conform to many FMVSS in the same manner as their U.S. certified counterparts, or are capable of being readily altered to conform to those standards.

Specifically, the petitioner claims that non-U.S. certified 2011–2012 BMW S1000RR motorcycles are identical to their U.S. certified counterparts with respect to compliance with Standard Nos. 106 *Brake Hoses*, 111 *Rearview Mirrors*, 116 *Brake Fluid*, 119 *New Pneumatic Tires for Vehicles other than Passenger Cars*, 122 *Motorcycle Brake Systems*, and 205 *Glazing Materials*.

The petitioner further contends that the vehicles are capable of being readily altered to meet the following standards, in the manner indicated below:

Standard No. 108 *Lamps, Reflective Devices and Associated Equipment*: Installation of the following U.S.-model components: front amber reflectors, rear red reflectors, front head lamp, and rear stop lamp.

Standard No. 120 *Tire Selection and Rims for Vehicles other than Passenger Cars*: Installation of a tire information placard.

Standard No. 123 *Motorcycle Controls and Displays*: Installation of a U.S.-model instrument cluster.

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 30141(a)(1)(B), a motor vehicle, including a trailer, that was not originally manufactured to conform to all applicable FMVSS, and has no substantially similar U.S.-certified counterpart, shall be refused admission into the United States unless NHTSA has decided that the motor vehicle has safety features that comply with, or are capable of being altered to comply with, all applicable FMVSS based on destructive test data or such other evidence as NHTSA decides to be adequate.

Petitions for eligibility decisions may be submitted by either manufacturers or importers who have registered with NHTSA pursuant to 49 CFR part 592. As specified in 49 CFR 593.7, NHTSA publishes notice in the **Federal Register** of each petition that it receives, and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA decides, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this decision in the **Federal Register**.

Skytop Rover Co. of Philadelphia, PA (Registered Importer 06–343) has petitioned NHTSA to decide whether nonconforming 2012 Ahlm SBT 16–25 trailers are eligible for importation into

the United States. Skytop Rover submitted information with its petition intended to demonstrate that 2012 Ahlm SBT 16–25 trailers are capable of being altered to comply with all standards to which they were not originally manufactured to conform. The petitioner contends that the nonconforming 2012 Ahlm SBT 16–25 trailers meet or are capable of being altered to meet the following standards, in the manner indicated:

Standard No. 106—*Brake Hoses*: Conforming hoses were purchased and installed during manufacture.

Standard No. 108 *Lamps, Reflective Devices and Associated Equipment*: The vehicle was equipped with a conforming 12-volt electrical system during manufacture. Conforming conspicuity tape and lights were installed during manufacture in a manner conforming to the standard.

Standard No. 119 *New Pneumatic Tires for Vehicles Other Than Passenger Cars*: The vehicle is equipped with tires conforming to the requirements of the standard.

Standard No. 120 *Tire Selection and Rims for Motor Vehicles Other Than Passenger Cars*: The vehicle will have a tire and rim information placard installed to meet the requirements of the standard.

Standard No. 121 *Air Brake Systems*: The vehicle was manufactured with an integrated axle, suspension, and brake package installed. The petitioner submitted test reports to validate that the system conforms to the requirements of the standard.

Standard No. 223 *Rear Impact Guards*: The petitioner provided test results for the rear impact guard to show that it conforms to the standard.

Standard No. 224 *Rear Impact Protection*: The vehicle was manufactured with a conforming rear impact guard, with the required label, installed in a manner consistent with the impact guard manufacturer's instructions.

All comments received before the close of business on the closing date indicated above will be considered, and will be available for examination in the docket at the above addresses both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.

Authority: 49 U.S.C. 30141(a)(1)(A) and (b)(1); 49 CFR 593.8; delegations of authority at 49 CFR 1.95 and 501.8.

All comments and supporting materials received after the closing date will also be filed and will be considered to the extent possible. When the petition is granted or denied, notice of the decision will be published in the **Federal Register** pursuant to the authority indicated below.

SUPPLEMENTARY INFORMATION:

I. GM's Petition: Pursuant to 49 U.S.C. 30118(d) and 30120(h) (see implementing rule at 49 CFR Part 556), GM submitted a petition for an exemption from the notification and remedy requirements of 49 U.S.C. Chapter 301 on the basis that this noncompliance is inconsequential to motor vehicle safety.

This notice of receipt of GM's petition is published under 49 U.S.C. 30118 and 30120 and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

II. Vehicles Involved: Affected are approximately 170 MY 2013 Chevrolet Equinox MPVs manufactured on January 24, 2013.

III. Noncompliance: GM explains that the noncompliance is that the vehicles are equipped with left-rear quarter windows that do not fully comply with the marking requirements specified in paragraph S6 of FMVSS No. 205.

GM further explained that the subject vehicles may be purchased with either solar glazing (having light transmittance greater than 70%) or privacy glazing (having light transmittance of approximately 22%) installed rearward of the driver. On the affected vehicles, the left-rear quarter window is privacy
