The regulations establish such a permit system to designate Antarctic Specially Protected Areas.

Application Details

Permit Application: 2014-028

1. *Applicant:* Ari Friedlaender, Hattfield Marine Science Center, Oregon State University

Activity for Which Permit Is Requested

Take and Import to the USA; The applicants propose to collect skin and blubber biopsy samples of minke, humpback and Arnoux's beaked whales. The applicants would address the following basic hypotheses that require collecting of genetic and blubber samples from biopsies. They will investigate the stock structure of whales that inhabit the nearshore waters of the AP which requires genetic information contained in skin samples. These samples can be processed and compared against voucher samples from breeding populations in the Pacific Ocean to determine the population structure of animals feeding in Antarctic waters. Likewise, the sex of individual whales can be determined from genetic markers from the skin samples. Knowing the ratios of males: females can provide information about the growth and structure of the cetacean communities. In order to understand the diet of different marine mammals and if/how these change spatially or over the course of a season, we can compare the stable isotope signatures in blubber to those of their known prey items. This common analysis is potent and can greatly inform studies on the feeding behavior of whales in the region. The applicants would use standard dart-biopsy methods that have been used for more than 2 decades and are proven to be both humane and appropriate. A small sterilized stainless steel tip would be attached to the end of a customized crossbow bolt that has a flotation stopper engineered on to it. When the dart hits the whale, it penetrates the outermost skin and collects a ~10x5 mm sample of both skin and blubber. These samples are placed in sterilized cryovials and kept in -20C freezers until they are shipped frozen back to our labs for analysis. All samples would be collected by investigators with significant experience in the process.

Location

Antarctic Peninsula between Marguerite Bay and the Gerlache Strait, inshore waters.

Dates

I. Introduction

On December 11, 2013, the Postal Service filed Notice, pursuant to 39 CFR 3015.5, that it has entered into a successor negotiated service agreement (Agreement) with Australia's foreign postal operator, Australia Postal Corporation (Australia Post).¹ The Postal Service seeks to have the inbound portion of the Agreement, which concerns delivery of inbound Air CP² and Express Mail Services (EMS) in the United States, included within the Inbound Competitive Multi-Service Agreements with Foreign Postal Operators 1 (MC2010-34) product on the competitive product list. Notice at 3.

II. Contents of Filing

The Postal Service's filing consists of the Notice, financial workpapers, and
