

estimated to average 1,235 hours per response. "Burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners and operators of small municipal waste combustors.

Estimated Number of Respondents: 3.

Frequency of Response: Initially, occasionally, semiannually and annually.

Estimated Total Annual Hour Burden: 12,351.

Estimated Total Annual Cost: \$1,364,227, which includes \$1,195,891 in labor costs, \$66,000 in capital/startup costs, and \$102,336 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is an increase in burden hours for the respondents from the most recently approved ICR due to an increase of one new source subject to the regulation (i.e. respondent universe). The growth in respondent universe also results in an increase in the respondent labor costs and O&M costs.

Additionally, there is an increase in burden costs for the Agency from the most recently approved ICR due to an adjustment in labor rates. This ICR uses updated labor rates from the Bureau of Labor Statistics to calculate all burden costs.

Director, Collection Strategies Division.
