SUPPLEMENTARY INFORMATION: On November 27, 2009 (74 FR 62355), the NRC published for public comment the proposed appendix "Guidance for Crediting Manual Operator Actions in Diversity and Defense-in-Depth (D3) Analyses" in Chapter 18, "Human Factors Engineering". The staff received a total of 12 comments on the draft appendix from one industry stakeholder and the Advisory Committee for Reactor Safeguards. These comments can generally be characterized as: (1)

Requesting clarification of the draft guidance, (2) requesting additional guidance to address uncertainty in the analysis of time available and time required for operator action, and (3) requesting that the guidance be amended to allow for the crediting of actions in procedures other than emergency operating procedures (EOPs) and in locations other than the main control room. The staff made changes to the draft SRP in response to the first two categories of comments but did not make changes in response to the third category of comment. A summary of the comments and the staff's disposition of the comments are available in a separate document, Response to Public Comments on Draft Standard Review Plan (SRP) Appendix 18-A, "Guidance for Crediting Manual Operator Actions in Diversity and Defense-in-Depth (D3) Analyses" (ADAMS Accession No. ML13115A144).

Backfitting and Issue Finality

Appendix 18—A of the SRP provides guidance to the staff for reviewing applications for a construction permit and an operating license under Part 50 of Title 10 of the *Code of Federal Regulations* (10 CFR) with respect to human factors engineering. The SRP also provides guidance for reviewing an application for a standard design approval, a standard design certification, a combined license, and a manufacturing license under 10 CFR part 52 with respect to those same subject matters.

Issuance of these SRP section revisions does not constitute backfitting as defined in 10 CFR 50.109 (the Backfit Rule) nor is it inconsistent with the issue finality provisions in 10 CFR part 52. The NRC's position is based upon the following considerations.

1. The SRP positions would not constitute backfitting, in as much as the SRP is internal guidance to NRC staff.

The SRP provides internal guidance to the NRC staff on how to review an application for NRC regulatory approval in the form of licensing. Changes in internal staff guidance are not matters for which either nuclear power plant applicants or licensees are protected under either the Backfit Rule or the issue finality provisions of 10 CFR part 52.

2. The NRC staff has no intention to impose the SRP positions on existing licensees either now or in the future.

The NRC staff does not intend to impose or apply the positions described in the SRP to existing licenses and regulatory approvals. Hence, the issuance of this SRP—even if considered guidance within the purview
