SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a currently approved information collection. Regulations at 50 CFR 648.8 and § 697.8 require that owners of vessels over 25 ft (7.6 m) in registered length that have Federal permits to fish in the Greater Atlantic Region display the vessel's name and official number. The name and number must be of a specific size at specified locations: the vessel name must be affixed to the port and starboard sides of the bow and, if possible, on its stern. The official number must be displayed on the port and starboard sides of the deckhouse or hull, and on an appropriate weather deck so as to be clearly visible from enforcement vessels and aircraft. The display of the identifying characters aids in fishery law enforcement.

II. Method of Collection

No information is submitted to NOAA Fisheries as a result of this collection.

III. Data

OMB Control Number: 0648-0350.

Form Number: None.

Type of Review: Regular submission (extension of a currently approved collection).

Affected Public: Individuals and households; business or other for-profit organizations.

Estimated Number of Respondents: 4,513.

Estimated Time per Response: 45 minutes to affix vessel name and registration number to the vessel.

Estimated Total Annual Burden Hours: 3,385.

Estimated Total Annual Cost to Public: \$33,850 for paintbrushes, paint, and stencils.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

SUPPLEMENTARY INFORMATION:

Background: GIS is designed to capture, store, analyze, manage, and present all types of geographic data. Over the past decade, the use of these systems in fisheries management has grown rapidly and requests for geospatial data have increased. To satisfy the need for geospatial data, NMFS's Greater Atlantic Regional Fisheries Office (GARFO) has developed standardized, high-quality geospatial data for areas managed by GARFO. This includes areas authorized under the Magnuson-Stevens Fishery Conservation and Management Act, the Atlantic Coastal Fisheries Cooperative Management Act, the Endangered Species Act, and the Marine Mammal Protection Act.

Creation of GIS Files: In developing these files, we implemented standards and policies to ensure that the files are of high, known quality and are accompanied by the metadata that are compliant with the Federal Geographic Data Committee's Standards. Metadata is information that captures the basic characteristics of the data, its creation, its usage, and any constraints. Data files are in an ESRI shapefile format. In developing the GIS files, we interpreted any regulatory area boundary intended to be a straight line on a chart in Mercator projection to be a rhumb line. GARFO regulations frequently define an area's boundary by coordinates that define the corners of the feature. In developing the GIS files, errors may be introduced into the boundary if only the endpoints of the boundary are used. This error may increase as the distance between coordinates increases. To ensure that the shapefiles developed accurately represent the boundaries, we held the lines to a constant bearing by adding vertices between coordinates using the Construct Loxodrome tool or by densifying the line every 10 nautical miles in a Mercator projection within ESRI's ArcGIS software.

Data Availability: The files are in the form of ESRI shapefiles packaged as zipped files for each regulated area. As the files for each regulated area are finalized, they will be made publicly available via our Web site. Files may be downloaded from www.nero.noaa.gov/gis or obtained by written request to the GARFO (see **ADDRESSES**). For each regulated area, we provide the shapefile, the metadata (within the shapefile and as a PDF), and a reference map image (pdf and jpg format). The purpose of the reference map image is to allow users to quickly locate files for managed areas that are of interest.

Request for Comments: We will accept public comments on this new service, including data creation, as described above.

Dated: April 30, 2014.

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
