

purchased before the HSA, remaining in storage. This helium will be delivered in proportion to each refiner's volume in storage up to 3 percent each month.

Each refiner will be allowed delivery of helium up to the prescribed amount calculated in AL_R and PHSA. If a refiner

receives more than allowed, the overage will be subtracted from the volume calculated to be delivered in the next calculation month. Amounts not delivered will not carry forward to the next calculation month. Refiners that provide tolling services to non-refiners for any of the non-refiners' helium will

earn a 2 for 1 credit applied to the next calculation month determination of the refiner's AL_R.

3.04 Do you have a hypothetical example of how the Delivery Schedule would be implemented? An example of the process detailed in section 3.03 follows:

	Planned	Refiner	Toller A	Refiner allowed	Refiner actual	Toll actual	Carry over
Refiner A:							
In-Kind	2,000	2,000	500	2,500	1,990	500
Auction	2,500	2,500	750	3,250	2,400	750
Allocated	30,080	30,080	30,080	25,000	2,500
Pre-HSA Stored	1,567	1,567	1,567	1,500
Refiner B:							
In-Kind	2,000	2,000	2,000	2,100
Auction	200	200	200	200
Allocated	45,119	45,119	45,119	46,000	(881)
Pre-HSA Stored	1,791	1,791	1,791	1,791
Toller A:							
In-kind	500
Auction	750
Pre-HSA Stored

In the example, Refiner A is receiving 4,500 Mcf of in-kind and auction helium, and refining for Toller A an additional 1,250 Mcf of Toller A's in-kind and auction helium. Refiner A also has 30,080 Mcf of allocated helium purchased at Phase A or Phase B sales and a percentage of its pre-HSA stored volume of 1,567 Mcf available for delivery. As a result of the 1,250 Mcf of tolling, Refiner A will get a 2,500 Mcf credit in the next calculation month determination for allowed allocated helium delivery. Refiner B is receiving 2,200 Mcf of in-kind and auction helium. It actually received 100 Mcf more of auction helium with no penalty. Since Refiner B did not toll any helium for a non-refiner, it did not earn a subsequent tolling credit. However, Refiner B did overdraw its allowance of allocated helium by 881 Mcf. This overage will be deducted during the next calculation month. Toller A had its in-kind and auction helium refined. Not illustrated in the example is a circumstance where there is not enough monthly production capacity to meet refiner and toller planned helium delivery. When planned delivery exceeds available delivery capacity, the allocated helium delivery (after prior calculation month corrections) will be prorated based on refiner/non-refiner total helium in storage.

In-Kind Program

4.01 What is the Federal In-Kind Program? Federal helium suppliers, who have contracts to supply helium to the Federal Government (agencies, government contractors, and

universities with certified Federal grant numbers), are required to buy like amounts of helium from the Federal Helium Reserve. The supplied helium may originate from sources other than the Federal Helium Reserve. Replenishment of helium volumes provided to the government typically takes about 5 months to complete; however, the helium is sold to the suppliers at a discounted rate compared to open market rate.

4.02 Who participates in the Program? Federal helium suppliers, Federal agencies and grant recipients participate in the Federal In-Kind Program.

4.03 How do I participate? You may be a participant in the Federal In-Kind Program if you are a supplier of pure helium and have entered into contracts to supply helium to the Federal Government; or you are a Federal agency requesting helium deliveries; or you are a Federal end user with a per location local volume of 200 Mcf per year and wish to participate in the In-Kind Program. Potential Federal end users/Federal grant recipients and universities are encouraged to register with the BLM at the provided Web page link: <http://www.blm.gov/nm/helium>.
