SUPPLEMENTARY INFORMATION: This ICR seeks approval under the PRA for revisions to the OSHA Grantee Quarterly Progress Report. The OSHA uses the Grantee Quarterly Progress Report, Form OSHA-171, to collect information concerning activities conducted during the quarter by grantees under OSHA's Susan Harwood training grants. This information is used to monitor progress to determine whether the organization is using Federal grant funds as specified in its grant application. This information collection has been classified as a revision, because the Agency proposes to reformat the form and to collect information on the total number of training hours provided by a grantee. The Occupational Safety and Health Act authorizes this information collection. See 29 U.S.C. 670.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1218-0100. The current approval is scheduled to expire on May 31, 2014; however, the DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. New requirements would only take effect upon OMB approval. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on January 9, 2014 (79 FR 1658).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within 30 days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1218-0100. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.
