

This change doubles the response burden because EIA would be collecting two rounds of data from respondents under this OMB clearance number.

In the past EIA has calculated the amount of petrochemical feedstocks and asphalt that are produced by a refinery and used elsewhere in manufacturing. To obtain more accurate estimates of these two energy sources EIA proposes collecting data about petrochemical feedstocks and asphalt. The data collected about petrochemical feedstocks and asphalt will be largely what the MECS collects about other energy sources; purchases, expenditures, transfers in, produced on-site, used as fuel and nonfuel, and shipments data. Petrochemical feedstocks and asphalt are used in a few industries, so the MECS will collect data about these energy sources from those NAICS codes that use this type of energy; namely, petrochemical manufacturing (NAICS 325110), asphalt paving mixture and block manufacturing (NAICS 324121), and asphalt shingle and coating materials manufacturing (NAICS 324122). The response burden will be kept to a minimum because the data collected about petrochemical feedstocks and asphalt will only be collected from the industries listed above.

EIA is working with the Advanced Manufacturing Office (AMO) at DOE to reform the questions in the Energy Management and General Technologies sections on the MECS. The data collected would help EIA and DOE to develop manufacturing energy efficiency improvements. These will be "Yes"/"No" questions that will not significantly affect response burden.

Further, EIA plans to ask iron and steel mills (NAICS 331111) about their use of blast furnaces and electric arc furnaces (EAF) at the establishment. This will help EIA identify whether an iron and steel mill is an integrated or a mini mill, and help determine if all the essential energy data has been collected from the establishment. These will be "Yes"/"No" questions that will not significantly affect response burden.

Besides the changes already discussed, the content of the 2014 and 2016 MECS will be largely unchanged from the 2010 survey. Most respondents will submit their data electronically in a question-answer format as opposed to the spreadsheet format used in the past. The MECS information products will continue to present industry-by-Census Region level data as well as national data;

(5) *Annual Estimated Number of Respondents*: 31,000;

(6) *Annual Estimated Number of Total Responses*: 10,333;

(7) *Annual Estimated Number of Burden Hours*: 95,160;

(8) *Annual Estimated Reporting and Recordkeeping Cost Burden*: EIA estimates that there are no additional costs to respondents associated with the survey other than the costs associated with the burden hours;
