**Magnuson-Stevens Act Provisions;
General Provisions for Domestic
Fisheries; Application for Exempted
Fishing Permits**

AGENCY: National Marine Fisheries
Service (NMFS), National Oceanic and
Atmospheric Administration (NOAA),
Commerce.

ACTION: Notice; request for comments.

SUMMARY: The Assistant Regional
Administrator for Sustainable Fisheries,
Greater Atlantic Region, NMFS
(Assistant Regional Administrator), has
made a preliminary determination that
an Exempted Fishing Permit (EFP)
application contains all of the required
information and warrants further
consideration. This EFP would allow
two commercial fishing vessels to fish
outside of the limited access scallop
days-at-sea (DAS) program in support of
scallop incidental mortality research
conducted by the Coonamessett Farm
Foundation. It would also allow the
vessels to fish in the Eastern and
Western Areas of the Nantucket
Lightship Closed Area. Additionally, the
EFP would exempt participating vessels
from the crew size restriction and
reporting requirements, and would
allow vessels to temporarily possess
various species of fish for sampling
purposes only.

Regulations under the Magnuson-
Stevens Fishery Conservation and
Management Act require publication of
this notification to provide interested
parties the opportunity to comment on
applications for proposed EFPs.

DATES: Comments must be received on
or before July 2, 2014.

ADDRESSES: You may submit written
comments by any of the following
methods:

Mortality EFP.”

SUPPLEMENTARY INFORMATION: The
Coonamessett Farm Foundation has
been awarded a grant through the
Atlantic sea scallop research set-aside
program to conduct a project titled:
“Estimating Incidental Mortality in the
Sea Scallop Fishery.”

The project investigators have
proposed to use a Remotely Operated
Vehicle (ROV), dredge-mounted
cameras, and a camera trolley to
examine the dredge path of a 4.57-
meter-wide Turtle Deflector Dredge to
calculate incidental mortality of
scallops. The researchers plan on
conducting three trips, two in July and
August 2014, and a third in July 2015,
on two fishing vessels. Each trip will be
five to six days-at-sea (DAS), with
approximately 6 tows/day, for a total of
approximately 30 tows per trip. The
tows would be made on commercial
scallop grounds in Southern New
England, including the Eastern and
Western portions of Nantucket
Lightship Closed Area, where sector
groundfish vessels have been given a
FY2014 exemption to fish (see
coordinates later in this preamble). This
excludes the central portion, which is
an Essential Fish Habitat closure area,
50 CFR 648.81(h)(vi). The paths would
be made by a dredge equipped with
forward facing cameras towed at
commercial speed (4.5 knots) and would
be 500 meters long, for a maximum
duration of 30 minutes. Video data
would be collected by the ROV in such
a manner as to determine the quantity
and condition of species left in the
dredge path with the main focus being

on sea scallops. Dredge catches would
be examined to evaluate dredge
efficiency, discard mortality, and meat
losses associated with scallop condition
and processing. Researchers expect to
conduct at most one trip within portions
of the Nantucket Lightship Closed Area,
in order to examine an area with low
fishing pressure. No catch would be
retained for sale. All scallops and fish
would be returned to the sea after video
monitoring of the tow path is
completed.

The applicant anticipates catching the
following amount of fish on each trip:

Species	Estimated lbs in 30 tows
Sea scallop	600
Yellowtail flounder	150
Winter flounder	150
Windowpane flounder	150
Summer flounder	150
Fourspot flounder	150
American plaice	75
Grey sole	75
Haddock	25
Atlantic cod	25
Monkfish	150
Spiny dogfish	50
Barndoor skates	100
Little skates	500
Winter skates	500

To conduct this study, Coonamessett
Farm Foundation investigators
submitted a complete EFP application
on April 11, 2014, requesting an
exemption allowing two commercial
fishing vessels to fish outside of the
limited access Atlantic sea scallop DAS
regulations found at 50 CFR 648.53(b).
In addition, the EFP would exempt
participating vessels from the crew size
regulations at 50 CFR 648.51(c);
reporting requirements specified in 50
CFR 648.7(f); and regulations preventing
fishing in the Nantucket Lightship
Closed Area specified in 50 CFR
648.81(c) and 50 CFR 648.59(d).

The waters in the Eastern Area of the
Nantucket Lightship Closed Area are
defined by straight lines connecting the
following points in the order stated
here:

Point	N. lat.	W. long.
A	40°50'	69°30'
B	40°50'	69°00'
C	40°20'	69°00'
D	40°20'	69°30'
A	40°50'	69°30'

The waters in the Western Area of the
Nantucket Lightship Closed Area are
defined by straight lines connecting the
following points in the order stated
here:

Point	N. lat.	W. long.
A	40°50'	70°20'
B	40°50'	70°00'
C	40°20'	70°00'
D	40°20'	70°20'
A	40°50'	70°20'

As stated above, this excludes the central portion of the Nantucket Lightship Closed Area, which is an Essential Fish Habitat closure area. The EFP would also temporarily exempt participating vessels from possession limits and minimum size requirements specified in 50 CFR part 648, sub-sections B and D through O, for sampling purposes only. Any fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.

If approved, the applicant may request minor modifications and extensions to the EFP throughout the year. EFP modifications and extensions may be granted without further notice if they are deemed essential to facilitate completion of the proposed research and have minimal impact that do not change the scope or impact of the initially approved EFP request. Any fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.
