

organizations, to provide comment on, and offer proposals for: (1) Addressing significant disproportionality; (2) encouraging greater voluntary use of funds for CEIS in LEAs showing significant disparities (but no determination of significant disproportionality) by race and ethnicity in the rates of identification of children for special education, including identification by disability category, educational placements, and disciplinary actions; and (3) encouraging more effective, targeted use of funds for CEIS to address significant disproportionality in both districts required to use funds for CEIS (as a result of a determination of significant disproportionality) and districts choosing to use funds for CEIS. The Department will review the data collected under section 618 of the IDEA and by the Department's Office for Civil Rights, together with the information in the GAO report and all of the input and information received in response to this RFI, to determine what, if any, actions the Department should take to address significant disproportionality.

The Assistant Secretary requests comment on the following questions:

1. Should the Department issue proposed regulations requiring States to use a standard approach to determine which LEAs have significant disproportionality? If so, how might a standard approach properly account for State differences (e.g., population size, population composition, and LEA size)? If so, what should be included in such a standard approach?

2. What actions, apart from requiring a standard approach, should the Department take to address the very small number of LEAs identified with significant disproportionality, despite data (including the data the Department collects under section 618 of the IDEA, data collected by the Department's Office for Civil Rights, and the information in the GAO report) showing significant disparities, based on race and ethnicity, in the identification of children for special education, including by disability category, educational placements, and disciplinary actions?

3. What actions, including research- or evidence-based actions, should the Department take to: (a) Encourage greater voluntary use of funds for CEIS in LEAs showing significant disparities (but no determination of significant disproportionality, pursuant to 34 CFR § 300.646), by race and ethnicity, in the rates of identification of children for special education, including identification by disability category, educational placements, and

disciplinary actions; and (b) assist LEAs in more effectively targeting their use of funds for CEIS to address significant disproportionality in both districts required to use funds for CEIS (as a result of a determination of significant disproportionality) and districts choosing to use funds for CEIS, in a manner that is both consistent with the requirements of the IDEA and which will help to address the causes and effects of significant disproportionality?
