BILLING CODE 4910-RY-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA-2014-0030]

Petition for Waiver of Compliance

In accordance with Part 211 of Title 49 Code of Federal Regulations (CFR), this document provides the public notice that by a document dated March 25, 2014, the Gulf & Ohio Railways, Inc. (G&O), on behalf of one of its companies, the Knoxville & Holston River Railroad (KXHR), petitioned the Federal Railroad Administration (FRA) for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR Part 215, Railroad Freight Car Safety Standards. FRA assigned the petition Docket Number FRA-2014-0030.

G&O requests a waiver on behalf of KXHR from the stenciling requirement specified in 49 CFR 215.303, *Stenciling of restricted cars*, for nine freight cars. The nine cars' reporting marks, car numbers, type, capacity, condition, status, and year built are listed in a table contained in the petition letter.

KXHR operates over 22 miles of track in and around Knoxville, TN. Established in 1998, it normally handles in excess of 7,000 carloads annually. It also operates the Three Rivers Rambler excursion train, owned by a sister company, which travels to and from Knoxville over a 5.5-mile portion of the railroad along the Tennessee River. The excursion train, powered mostly by a steam locomotive, uses three passenger cars built about 80 years ago. Between the two companies, they own nine freight cars that are more than 50 years of age. These cars are being preserved because of their educational value, usefulness in creating an antique freight train that can be operated for photographs, and as a backdrop for the antique passenger train. The maximum

operating speed of these cars will be 10 mph. These cars have been examined and are safe to operate under the conditions in this petition. In the case of cars that are not yet operable, they will be examined and not operated unless they are found to be safe under the conditions requested in this petition. These nine cars will not be interchanged with other railroads.

G&O states that these cars are a collection of antique equipment that is not intended for operation except (1) for repositioning when needed and (2) for photo freight trains, not to exceed three times per year, 20 miles per trip, except that Car KXHR 9 will operate as an open air passenger car on the Three Rivers Rambler excursion train at 10 mph.

In addition, G&O has requested a Special Approval for these nine cars to continue in service in accordance with 49 CFR 205.203(c).

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov and in person at the U.S. Department of Transportation's (DOT) Docket Operations Facility, 1200 New Jersey Avenue SE., W12-140, Washington, DC 20590. The Docket Operations Facility is open from 9 a.m. to 5 p.m., Monday through Friday, except Federal Holidays.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

In accordance with Part 211 of Title 49 of the Code of Federal Regulations (CFR), this document provides the public notice that by a document dated May 5, 2014, Rouge Valley Terminal Railroad Corporation (RVTC) petitioned the Federal Railroad Administration (FRA) for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR Part 223, Safety Glazing Standards—Locomotives, Passenger Cars, and Cabooses. FRA assigned the petition Docket Number FRA-2014-0044.

RVTC petitioned for a waiver of compliance for one locomotive from the requirements of 49 CFR 223.11, *Requirements for existing locomotives*, which requires certified glazing in all locations. The subject locomotive is a leased EMD Model SW1 Locomotive built in 1949 and bearing the number WRIX 1001. This locomotive is operated over 9.5 miles of RVTC track and 2 miles of Central Oregon and Pacific Railroad track (for interchange of freight cars), all within the Medford Industrial Park in White City, OR. Speeds do not exceed 10 mph. It is equipped with glazing that meets an ASI rating of AS-1. This locomotive operates over the same trackage under glazing waiver FRA-2008-0106, issued to former operator White City Terminal and Utility Railway, for the last 5 years with no incidents of vandalism to the glazing or any other railroad property. This new waiver petition was necessitated by a
