

formally designated by the EPA as either reference or equivalent methods under EPA regulations at 40 CFR Part 53. A manufacturer or seller of an air monitoring method (e.g. an air monitoring sampler or analyzer) that seeks to obtain such EPA designation of one of its products must carry out prescribed tests of the method. The test results and other information must then be submitted to the EPA in the form of an application for a reference or equivalent method determination in accordance with 40 CFR Part 53. The EPA uses this information, under the provisions of Part 53, to determine whether the particular method should be designated as either a reference or equivalent method. After a method is designated, the applicant must also maintain records of the names and mailing addresses of all ultimate purchasers of all analyzers or samplers sold as designated methods under the method designation. If the method designated is a method for fine particulate matter (PM_{2.5}) and coarse particulate matter (PM_{10-2.5}), the applicant must also submit a checklist signed by an ISO-certified auditor to indicate that the samplers or analyzers sold as part of the designated method are manufactured in an ISO 9001-registered facility. Also, an applicant must submit a minor application to seek approval for any proposed modifications to previously designated methods.

Pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments and information to enable it to: (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: This ICR covers the burden associated with EPA Form 3520-21, a declaration form for importers of nonroad vehicles or engines into the United States, which identifies the regulated category of engine or vehicle and the regulatory provisions under which the importation is taking place. In addition, this ICR covers the possible

burden of EPA Form 3520-8 if it comes to be used to request final importation clearance for Independent Commercial Importers of nonroad Compression Ignition engines, who would have to bring the engines into compliance and provide test results, comparable to the use of Form 3520-8 for on-road vehicles and engines as covered by OMB 2060-0095. The information is used by Agency enforcement personnel to verify that all nonroad vehicles and engines subject to Federal emission requirements have been declared upon entry or that the category of exclusion or exemption from emissions requirements has been identified in the declaration. The information is also used to identify and prosecute violators of the regulations and to monitor the program in achieving the objectives of the regulations. The Forms are required before making customs entry; see 19 CFR 12.73 and 12.74.

Form Number: 3520-21.

Frequency of response: Once per entry. (One form per shipment may be used.)

Respondents/affected entities: Information collected is from individual importers, or companies who import and manufacture nonroad engines and recreational vehicles.

Respondent's obligation to respond: Required for any importer to legally import nonroad vehicles or engines into the U.S.

Estimated number of respondents: 12,000.

Total estimated burden: 6029 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$410,178.38 (per year), includes \$38,002 annualized capital or operation & maintenance costs.

Changes in Estimates: This is an increase in \$110,896.39 the total estimated respondent burden compared with the ICR currently approved by OMB. The program has remained consistent over time and the increase in burden is primarily due to costs of labor.

Dated: June 19, 2014.

Director, Compliance Division, Office of Transportation and Air Quality.
