

vita; and (5) a biographical sketch of the nominee indicating current position, educational background, past and current research activities, recent relevant service, and other comments on the relevance of the nominee's expertise to this peer review topic. Compensation is not available, in order to ensure an unbiased review process.

Selection Process: An interagency panel will select from the available nominees according to the selection criteria presented above. An independent search for candidates to assemble a balanced group representing the expertise needed to fully evaluate the draft document may also occur. Up to eight reviewers will be selected who best provide expertise spanning the multiple areas listed above and, to the extent feasible, best provide a balance of perspectives.

Persons with disabilities who require alternate means for communication of program information (Braille, large print, audio tape, etc.) should contact USDA's Target Center at (202) 720-2600 (voice and TDD).

Joseph W. Glauber,
Chief Economist.

[Docket No. APHIS-2014-0053]

Notice of Request for Extension of Approval of an Information Collection; Pork and Poultry Products From Mexico Transiting the United States

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request an extension of approval of an information collection associated with the regulations for pork and poultry products from Mexico transiting the United States.

DATES: We will consider all comments that we receive on or before September 8, 2014.

ADDRESSES: You may submit comments by either of the following methods:

- **Federal eRulemaking Portal:** Go to <http://www.regulations.gov/> #!docketDetail;D=APHIS-2014-0053.

- **Postal Mail/Commercial Delivery:** Send your comment to Docket No. APHIS-2014-0053, Regulatory Analysis and Development, PPD, APHIS, Station 3A-03.8, 4700 River Road Unit 118, Riverdale, MD 20737-1238.

Supporting documents and any comments we receive on this docket may be viewed at <http://www.regulations.gov/> #!docketDetail;D=APHIS-2014-0053 or in our reading room, which is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799-7039 before coming.

FOR FURTHER INFORMATION CONTACT: For information on pork and poultry products from Mexico transiting the United States, contact Dr. Lynette Williams, Senior Staff Veterinarian, National Import Export Services, VS, APHIS, 4700 River Road Unit 40, Riverdale, MD 20737; (301) 851-3300. For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 851-2908.

SUPPLEMENTARY INFORMATION:

Title: Pork and Poultry Products From Mexico Transiting the United States.

OMB Control Number: 0579-0145.

Type of Request: Extension of approval of an information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture (USDA) is authorized, among other things, to prohibit or restrict the importation and interstate movement of animals, animal products, and other articles to prevent the introduction into and dissemination within the United States of animal diseases and pests. To fulfill this mission, APHIS regulates the importation of animals and animal products into the United States. The regulations are contained in title 9, chapter 1, subchapter D, parts 91 through 99, of the Code of Federal Regulations (CFR).

The regulations in 9 CFR 94.15 allow pork and pork products and poultry carcasses, parts, and products (except eggs and egg products) that are not eligible for entry into the United States to transit the United States from specified States in Mexico, via land border ports, for export to another country.

The regulations set out conditions for the transit movements that protect

against the introduction of classical swine fever or Newcastle disease into the United States. These conditions involve the use of information collection activities, including the completion of a USDA, APHIS, Veterinary Services Application for Permit to Import or Transport Controlled Material or Organisms or Vectors (Veterinary Services Form 16-3), the placement of serially numbered seals on product containers, and the forwarding of a pre-arrival notification to U.S. port personnel.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.84 hours per response.

Respondents: U.S. importers of pork and poultry products from Mexico to the United States and the Federal animal health authorities in Mexico.

Estimated annual number of respondents: 34.

Estimated annual number of responses per respondent: 1.471.

Estimated annual number of responses: 50.

Estimated total annual burden on respondents: 42 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 1st day of July 2014.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

[Docket No. APHIS-2014-0021]

Notice of Availability of Pest Risk Analyses for the Importation of Chipilin Leaves and Edible Flowers of Chufle, Izote, and Pacaya From Guatemala Into the Continental United States

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of availability.

SUMMARY: We are advising the public that we have prepared pest risk analyses that evaluate the risks associated with importation of chipilin leaves and edible flowers of chufle, izote, and pacaya from Guatemala into the continental United States. Based on these analyses, we have determined that the application of one or more designated phytosanitary measures will be sufficient to mitigate the risks of introducing or disseminating plant pests or noxious weeds via the movement of chipilin leaves and edible flowers of chufle, izote, and pacaya from Guatemala. We are making these documents available to the public for review and comment.

DATES: We will consider all comments that we receive on or before September 8, 2014.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov/>#!/docketDetail;D=APHIS-2014-0021.
- *Postal Mail/Commercial Delivery:*

Send your comment to Docket No. APHIS-2014-0021, Regulatory Analysis and Development, PPD, APHIS, Station 3A-03.8, 4700 River Road, Unit 118, Riverdale, MD 20737-1238.

Supporting documents and any comments we receive on this docket may be viewed at <http://www.regulations.gov/>#!/docketDetail;D=APHIS-2014-0021 or in our reading room, which is located in Room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except

holidays. To be sure someone is there to help you, please call (202) 799-7039 before coming.

FOR FURTHER INFORMATION CONTACT: Ms. Claudia Ferguson, Senior Regulatory Policy Coordinator, Regulatory Coordination and Compliance, Regulations, Permits and Manuals, PPQ, APHIS, 4700 River Road, Unit 133, Riverdale, MD 20737-1231; (301) 851-2352.

SUPPLEMENTARY INFORMATION: Under the regulations in “Subpart-Fruits and Vegetables” (7 CFR 319.56-1 through 319.56-68, referred to below as the regulations), the Animal and Plant Health Inspection Service (APHIS) prohibits or restricts the importation of fruits and vegetables into the United States from certain parts of the world to prevent the introduction and dissemination of plant pests that are new to or not widely distributed within the United States.

Section 319.56-4 contains a performance-based process for approving the importation of certain fruits and vegetables that, based on the findings of a pest risk analysis, can be safely imported subject to one or more of the phytosanitary measures listed in paragraph (b) of that section.

APHIS received a request from the national plant protection organization (NPPO) of Guatemala to allow the importation of chipilin leaves (*Crotalaria longirostrata*) and edible flowers of chufle (*Calathea macrosepala*), izote (*Yucca guatemalensis*), and pacaya (*Chamaedorea tepejilote*) into the continental United States.

As part of our evaluation of Guatemala's request, we have prepared pest risk assessments (PRAs) to identify pests of quarantine significance that could follow the pathway of importation into the continental United States from Guatemala and, based on the PRAs, risk management documents (RMDs) to identify phytosanitary measures that could be applied to the commodities to mitigate the pest risk. (The PRAs evaluating the pest risks for chipilin leaves, chufle, and pacaya were originally drafted for a market access request from El Salvador; however, these PRAs also address the risks associated with importing these commodities from Guatemala.) We have concluded that chipilin leaves and edible flowers of chufle, izote, and pacaya can be safely imported from Guatemala to the continental United States using one or more of the five designated phytosanitary measures listed in § 319.56-4(b). These measures are:

- The commodities must be imported as commercial consignments only;
- Each consignment must be accompanied by a phytosanitary certificate issued by the NPPO of Guatemala; and
- Each consignment is subject to inspection upon arrival at the port of entry to the United States.

Therefore, in accordance with § 319.56-4(c), we are announcing the availability of our PRAs and RMDs for public review and comment. The documents may be viewed on the Regulations.gov Web site or in our reading room (see **ADDRESSES** above for a link to Regulations.gov and information on the location and hours of the reading room). You may request paper copies of the PRAs and RMDs by calling or writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. Please refer to the subject of the analysis you wish to review when requesting copies.

After reviewing any comments we receive, we will announce our decision regarding the import status of chipilin leaves and edible flowers of chufle, izote, and pacaya from Guatemala in a subsequent notice. If the overall conclusions of our analyses and the Administrator's determination of risk remain unchanged following our consideration of the comments, then we will authorize the importation of chipilin leaves and edible flowers of chufle, izote, and pacaya from Guatemala into the continental United States subject to the requirements specified in the RMDs.

Authority: 7 U.S.C. 450, 7701-7772, and 7781-7786; 21 U.S.C. 136 and 136a; 7 CFR 2.22, 2.80, and 371.3.

Done in Washington, DC, this 1st day of July 2014.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.
