SUPPLEMENTARY INFORMATION:

Background

The Fort Benning, GA, restricted area complex consists of seven subareas designated R-3002A through G. Restricted areas R-3002A through F lie within the Eastern time zone, while R-3002G is a small segment that lies within the Central time zone. Normally, the times listed in the “time of designation” for a restricted area include the qualifier “local time” in the description. However, when a complex overlaps more than one time zone, the predominant time zone is specified in the time of designation for the lesser subarea even though that area extends into an adjacent time zone. In this case, all R-3002 subareas, except area G, lie within the Eastern time zone and the using agency schedules activation of the entire area based on Eastern time. Therefore, to avoid possible confusion, “Eastern time” is being added to the time of designation for R-3002G.

The Rule

This action amends Title 14 Code of Federal Regulations (14 CFR) part 73 by removing the words “local time” from the time of designation for restricted area R-3002G, Fort Benning, GA, and inserting the words “Eastern time.” Since all R-3002 subareas, except area G, lie within the Eastern time zone, the Eastern time zone is predominant and is used for scheduling the activation of all subareas (A through G).

Because this amendment is simply an editorial change that does not affect the boundaries, designated altitudes, or activities conducted within the restricted area, notice and public procedure under 5 U.S.C. 553(b) are unnecessary.

The FAA has determined that this action only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3)

does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with 311d., FAA Order 1050.1E, Environmental Impacts: Policies and Procedures. This airspace action is an administrative change to the description of restricted area R-3002G to clarify the time zone used in scheduling activation of the airspace. It does not alter the dimensions, altitudes, or activities conducted within the airspace; therefore, it is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.
