## SOCIAL SECURITY ADMINISTRATION

[Docket No. SSA–2014–0044]

### Notice of Senior Executive Service Performance Review Board Membership

**AGENCY:** Social Security Administration.

**ACTION:** Notice of Senior Executive Service Performance Review Board Membership.

Title 5, U.S. Code, 4314(c)(4), requires that the appointment of Performance Review Board members be published in the **Federal Register** before service on said Board begins.

The following persons will serve on the Performance Review Board which oversees the evaluation of performance appraisals of Senior Executive Service members of the Social Security Administration:

Donna Calvert  
Hyacinth Hinojosa  
James Julian  
Michael Kramer \*  
Lydia Marshall  
Natalie Lu \*  
Royce Min  
Rosemary Stricks \*  
David Thomas \*  
Amy Thompson  
Laura Train  
\* New Member

Dated: July 29, 2014.

**Reginald F. Wells,**

*Deputy Commissioner for Human Resources.*

[FR Doc. 2014–18560 Filed 8–5–14; 8:45 am]

## DEPARTMENT OF TRANSPORTATION

### Federal Highway Administration

[Docket No. FHWA–2014–0028]

#### Agency Information Collection Activities: Request for Comments for the Renewal of a Previously Approved Information Collection

**AGENCY:** Federal Highway Administration (FHWA), DOT.

**ACTION:** Notice and request for comments.

**SUMMARY:** In compliance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3521), this notice announces that FHWA will submit the collection of information described below to the Office of Management and Budget (OMB) for review and comment. The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on June 5, 2014. The PRA submission describes the nature of the information collection and its expected cost and burden.

**DATES:** Please submit comments by September 5, 2014.

**ADDRESSES:** You may submit comments identified by DOT Docket ID 2014–0028 by any of the following methods:

*Web site:* For access to the docket to read background documents or comments received go to the Federal eRulemaking Portal: Go to <http://www.regulations.gov>. Follow the online instructions for submitting comments.

*Fax:* 1–202–493–2251.

*Mail:* Docket Management Facility, U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590–0001.

*Hand Delivery or Courier:* U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.

**FOR FURTHER INFORMATION CONTACT:** Ann Shemaka, 202–366–1575, Office of Bridge Technology, Federal Highway Administration, Department of Transportation, 1200 New Jersey Avenue SE., Washington, DC 20590, Monday through Friday, except Federal holidays.

#### SUPPLEMENTARY INFORMATION:

*Title:* National Bridge Inspection Program.

*Background:* This collection is necessary to meet legislative requirements of Title 23 United States Code section 144, and the Code of

Federal Regulations, 23 Highways Part 650, Subpart C—National Bridge Inspection Standards which require States, Federal Agencies, and Tribal Governments to: (1) Perform and report inventory data from routine inspections, fracture critical inspections, and underwater inspections on all highway bridges on public roads, and element level inspections on highway bridges on the National Highway System; (2) report costs associated with the replacement of structurally deficient bridges; and (3) follow up on critical findings. The bridge inspection and replacement cost information that is provided to the FHWA is on an annual basis. The critical findings information is periodically provided to the FHWA. The bridge information is used for multiple purposes, including: (1) The determination of the condition of the Nation's bridges which is included in a biennial report to Congress on the Status of the Nation's Bridges; (2) for a report to the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Environment and Public Works of the Senate on the Nation's bridge inventory; (3) the data source for executing various sections of the Federal-aid program which involve highway bridges; (4) the data source for assessing the bridge penalty provisions of Title 23 United States Code section 119; and (5) for strategic national defense needs.

*Respondents:* 52 State highway agencies including the District of Columbia and Puerto Rico, Federal Agencies, and Tribal Governments. The number of inspections per respondent varies in accordance with the National Bridge Inspection Standards.

*Estimated Average Burden per Response:* The estimated average burden for each bridge inspection is 8 hours. The estimated average burden for each element level inspection is 25 minutes. The estimated average burden for each cost collection report is 90 hours. The estimated average burden for follow up on critical findings is 40 hours.

*Estimated Total Annual Burden Hours:* The annual burden hours associated with this renewal is 2,490,118 hours. This estimated figure is based on 306,800 annual instances for routine, fracture critical, and underwater inspections multiplied by 8 hours (2,454,400 hours); plus 69,500 annual element inspections multiplied by 25 minutes (28,958 hours); plus 90 hours for each cost report multiplied by 52 reports (4,680 hours); plus 40 hours for follow up on critical findings multiplied by 52 respondents (2,080 hours) for a combined annual burden of 2,490,118 hours.

<sup>14</sup> 17 CFR 200.30–3(a)(12).

**Public Comments Invited:** You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection of information is necessary for the U.S. DOT's performance, including whether the information will have practical utility; (2) the accuracy of the U.S. DOT's estimate of the burden of the proposed information collection; (3) ways to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized, including the use of electronic technology, without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

**Authority:** The Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended; and 49 CFR 1.48.

Issued on: August 1, 2014.

**Michael Howell,**

*Information Collection Officer.*

#### SUPPLEMENTARY INFORMATION:

**Title:** Motorcycle Crash Causation Study.

**OMB Control #:** 2125-0619.

**Background:** In 2011, there were 4,612 motorcycle crash-related fatalities in the United States—more than twice the number of motorcycle rider fatalities that occurred in 1997. This increase contrasts with a 33% reduction in the number of fatalities in passenger cars and light trucks.<sup>1</sup> In response to this growing concern, the U.S. Congress passed legislation to fund a Federal Highway Administration (FHWA) research effort into the causes of motorcycle crashes in the United States. Congress has recognized this problem and directed the Department of Transportation to conduct research that will provide a better understanding of the causes of motorcycle crashes. Specifically, in Section 5511 of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) Public Law 109-59, Congress directed the Secretary of Transportation to provide grants to the Oklahoma Transportation Center (OTC) for the purpose of conducting a comprehensive, in-depth motorcycle crash causation study that employs the common international methodology for in-depth motorcycle crash investigation developed by the Organization for Economic Cooperation and Development (OECD).<sup>2</sup> The Secretary of Transportation delegated authority to FHWA for the Motorcycle Crash

Causation Grants under Section 5511 (71 FR 30831). This study began in June, 2012 and has been successful in completing the necessary data collection.

#### Proposed Data Acquisition Methodology

##### *Use of Parallel and Complementary Procedures*

The OECD describes two complementary procedures to be performed for acquiring the data needed to understand the causes of motorcycle crashes. The first of these is the traditional in-depth crash investigation that focuses on the sequence of events leading up to the crash, and on the motorcycle, rider, and environmental characteristics that may have been relevant to the crash. The second procedure, known as the case-control procedure, complements the first. It requires the acquisition of matched control data to allow for a determination of the extent to which rider characteristics and pre-crash factors observed in the crash vehicles are present in similarly-at-risk control vehicles.

Such a dual approach offers specific advantages to the understanding of crashes and the development of countermeasures. The in-depth study of the crash by itself allows for analysis of the events antecedent to the crash, some of which, if removed or altered, could result in a change in subsequent events that would have led to a non-crash, or reduced crash severity outcome. The main purpose of acquiring matched data is to allow for inferences to be made regarding risk factors for crash causes. A brief explanation is provided here so that those less familiar with case-control procedures will understand the advantage of acquiring controls. Consider a hypothetical situation where it is observed that the proportion of *older riders* involved in crashes who were unfamiliar with the roadway is the *same as* the proportion of matched (similarly-at-risk) older control motorcycle riders not involved in crashes. Conversely, the proportion of *younger riders* involved in crashes who were unfamiliar with the roadway is the *greater than* the proportion of matched younger control motorcycle riders not involved in crashes. These hypothetical findings would suggest that a lack of familiarity with the roadway poses a greater crash risk for younger riders than it does for older riders. Other risk factors for crashes (i.e. gender, riding experience, fatigue level) for motorcyclists may also be examined in this manner. If scaled interval
