Proposed Information Collection; Comment Request; Alaska Pacific Halibut and Sablefish Fisheries: Individual Fishing Quotas (IFQs)

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for an extension of a currently approved information collection.

The National Marine Fisheries Service (NMFS) established the Individual Fishing Quotas (IFQs) Program to improve the long-term productivity of the sablefish and Pacific halibut fisheries by further promoting the conservation and management objectives of the Magnuson-Stevens Conservation Act, 16 U.S.C. 1801 *et seq.*, as amended in 2006 (Magnuson-Stevens Act) (with respect to sablefish) and the Northern Pacific Halibut Act of

1982 (with respect to Pacific halibut) while retaining the character and distribution of the fishing fleets as much as possible. The IFQ Program includes several provisions, such as ownership caps and vessel use caps that protect small producers, part-time participants, and entry-level participants that otherwise could be adversely affected by excessive consolidation.

The IFQ Program also includes other restrictions to prevent the halibut and sablefish fisheries from domination by large boats or by any particular vessel class. NMFS designed the requirements to maintain a predominantly owner-operated fishery, which was a key characteristic of the halibut and sablefish fisheries prior to the implementation of the IFQ Program. The IFQ Program provides each fisherman an IFQ that can be used any time during the open season to allow each fisherman to set his/her own pace and fishing effort.

Under the IFQ Program, quota share (QS) represents a harvesting privilege for a person. Annually, NMFS issues IFQ to QS holders to harvest specified poundage. The specific amount of IFQ held by a person is determined by the number of QS units held, the total number of QS units issued in a specific regulatory area, and the total pounds of sablefish or halibut allocated for the IFQ fisheries in a particular year. Fishermen may harvest the IFQ over the entire fishing season, which extends approximately from March through November 15.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for reinstatement with change of a previously approved information collection.

When creating a Request to Archive oceanographic data or information at the United States (U.S.) National Oceanographic Data Center (NODC), well-organized and complete metadata describing those data are needed for long term understanding and use of those data. The Send2NODC *web application* provides a web-based form for easily collecting required and optional descriptive metadata to describe oceanographic data in a way that supports Executive Order 12906 and structures those metadata to conform to the internationally used ISO 19115-2 Geospatial Metadata standard. Descriptive metadata informs the suitability of data for use by future data users and should provide critical context about how data were collected, what techniques and measurements were made, and data quality characterizations. Information about the data provider or other individuals is only used by NODC to contact the data provider with questions about submitted data, about the status of the data in the archival process, and to provide appropriate scientific recognition and attribution for submitted data. Send2NODC will be used by ocean scientists, principal investigators and their data managers.

II. Method of Collection

Respondents use the browser-based Send2NODC web application to provide information that was previously collected on a paper or electronic form. Using electronic File Transfer Protocol (FTP) to transfer digital files from the Data Provider to NODC are integrated into the Send2NODC web application, but the respondent may opt to send digital files to NODC using other media, such as on CD- or DVD-ROM discs or other media.
