Background

FMCSA has published notices of receipt of Federal diabetes exemption applications and its intent to grant the exemptions. The Agency also requested comments from the public. The comment period closed 30 days after the publication date and the exemptions were issued the day after the comment period closed.

FMCSA evaluated the eligibility of the drivers and determined that granting the exemptions to these individuals would achieve a level of safety equivalent to or greater than the level that would be achieved by complying with the current regulation 49 CFR 391.41(b)(3).

The determining criteria for and the conditions and requirements of the exemptions, to which all exempted drivers are subject, were discussed in detail when the docket was originally published (79 FR 35844). As always, any adverse comments that come in after the exemption is granted will be evaluated, and if they indicate that the driver is not achieving a level of safety equivalent to or greater than the level of safety that would be obtained by complying with the regulation, the exemption will be revoked. When

granted, the exemptions will enable these individuals with ITDM to operate in interstate commerce.

FMCSA received two comments in this proceeding. The comments are considered and discussed below.

An anonymous commenter stated that he or she is in favor of granting the exemptions to the aforementioned drivers.

Another anonymous commenter stated that a person “with diabetes that monitors their sugar levels, takes their medications as directed, watches their food intake and regularly makes doctor visits is healthier than most people.”

Two drivers published in the Docket No. FMCSA–2014–0017 (79 FR 35844), Gary L. Burkett (IL) and Frank E. Shamer (MD), are no longer using insulin and therefore do not need an exemption.
