

the final permit modifications for the National Pollutant Discharge Elimination System (NPDES) general permit (TXG330000) regulating discharges from oil and gas wells in the Coastal Subcategory in Texas and in the Stripper Subcategory which discharge into waters in Texas. These modifications would restore coverage eligibility for certain inland discharges that existed in the previous permit and require freshwater whole effluent toxicity species for discharges to freshwater receiving waters.

EPA proposed the draft permit modification in the **Federal Register** on December 2, 2013. EPA Region 6 has considered all comments received and makes few significant changes to the proposed permit. A copy of the Region's responses to comments and the final permit may be obtained from the EPA Region 6 internet site: <http://www.epa.gov/region6/water/npdes/genpermit/index.htm>.

FOR FURTHER INFORMATION CONTACT: Ms. Evelyn Rosborough, Region 6, U.S. Environmental Protection Agency, 1445 Ross Avenue, Dallas, Texas 75202-2733. Telephone: (214) 665-7515.

DATES: This permit modification is effective on September 22, 2014, and expires July 6, 2017. In accordance with 40 CFR 23, this permit shall be considered issued for the purpose of judicial review on October 6, 2014. Under section 509(b) of the CWA, judicial review of this general permit can be held by filing a petition for review in the United States Court of Appeals within 120 days after the permit is considered issued for judicial review. Under section 509(b)(2) of the CWA, the requirements in this permit may not be challenged later in civil or criminal proceedings to enforce these requirements. In addition, this permit may not be challenged in other agency proceedings.

SUPPLEMENTARY INFORMATION:

Changes from the proposed permit modification include:

1. Add "no visible sheen" limit to produced water discharges to inland waters;
2. Replace acute 48-hour toxicity freshwater testing with acute 24-hour toxicity LC-50 freshwater and remove the cease discharge requirement; and
3. Set October 1, 2017, deadline to comply with the acute Toxicity LC-50 limit.

Other Legal Requirements

A. State Certification

Under section 401(a)(1) of the CWA, EPA may not issue an NPDES permit until the State in which the discharge

will occur grants or waives certification to ensure compliance with appropriate requirements of the CWA and State law. The Railroad Commission of Texas issued the 401 certification on May 30, 2014.

B. Other Regulatory Requirements

When EPA issued the general permit in 2012, EPA had conducted evaluations required by Coastal Zone Management Act, National Environmental Policy Act, Endangered Species Act, Magnuson-Stevens Fishery Conservation and Management Act, Historic Preservation Act, Paperwork Reduction Act, and Regulatory Flexibility Act. The scope of today's permit modification action does not trigger requirements for new evaluations for compliance with those regulatory requirements.

EPA's current administrative record for the draft and re-proposed Geotechnical General Permit is available for review at the EPA Region 10 Office, Park Place Building, 1200 6th Avenue, Suite 900, Seattle, WA 98101, between 9:00 a.m. and 4:00 p.m., Monday through Friday. Oil Spill Requirements. Section 311 of the Act, 33 U.S.C. 1321, prohibits the discharge of oil and hazardous materials in harmful quantities. Discharges authorized under the Geotechnical General Permit are excluded from the provisions of CWA Section 311, 33 U.S.C. 1321. However, the Geotechnical General Permit will not preclude the institution of legal action, or relieve the permittees from any responsibilities, liabilities, or penalties for other unauthorized discharges of oil and hazardous materials, which are covered by Section 311.

Executive Order 12866. The Office of Management and Budget (OMB) exempts this action from the review requirements of Executive Order 12866 pursuant to Section 6 of that order.

Paperwork Reduction Act. EPA has reviewed the requirements imposed on regulated facilities in the Geotechnical General Permit and finds them consistent with the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq.

Regulatory Flexibility Act. Under the Regulatory Flexibility Act (RFA), 5 U.S.C. 601 et seq., a federal agency must prepare an initial regulatory flexibility analysis "for any proposed rule" for which the agency "is required by section 553 of the Administrative Procedure Act (APA), or any other law, to publish general notice of proposed rulemaking." The RFA exempts from this requirement any rule that the issuing agency certifies "will not, if promulgated, have a significant economic impact on a substantial number of small entities." EPA has

concluded that NPDES general permits are permits, not rulemakings, under the APA and thus not subject to APA rulemaking requirements or the RFA. Notwithstanding that general permits are not subject to the RFA, EPA has determined that the Geotechnical General Permit will not have a significant impact on a substantial number of small entities. This determination is based on the fact that the regulated companies are not classified as small businesses under the Small Business Administration regulations established at 49 FR 5023 et seq. (February 9, 1984). These facilities are classified as Major Group 13—Oil and Gas Extraction SIC 1311 Crude Petroleum and Natural Gas.

Authority: This action is taken under the authority of Section 402 of the Clean Water Act as amended, 42 U.S.C. 1342. I hereby provide notice that the public comment period for the Geotechnical General Permit re-proposal is reopened until September 30, 2014, in accordance with 40 CFR 124.10 and 124.13.

Dated: September 12, 2014.

Christine Psyk,

Associate Director, Office of Water and Watersheds, Region 10.
