Abstract: Subtitle I of the Resource Conservation and Recovery Act (RCRA), as amended, requires that EPA develop standards for Underground Storage Tank (UST) systems as may be necessary to protect human health and the environment, and procedures for approving state programs in lieu of the federal program. EPA promulgated technical and financial requirements for owners and operators of USTs at 40 CFR part 280, and state program approval procedures at 40 CFR part 281. This ICR is a comprehensive presentation of all information collection requirements contained at 40 CFR parts 280 and 281.

The data collected for new and existing UST system operations and financial requirements are used by owners and operators and/or EPA or the implementing agency to monitor results of testing, inspections, and operation of UST systems, as well as to demonstrate compliance with regulations.

Form Numbers: None.

Respondents/affected entities: Owners and operators of USTs.

Respondent's obligation to respond: Mandatory per 40 CFR Parts 280 and 281.

Estimated number of respondents: 211,686.

Frequency of response: Once and on occasion.

Total estimated burden: 5,068,897 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$375,584,849 (per year), includes \$223,435,559 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 1,684,661 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to an update in the respondent universe and burden estimates based on updated data from the Office of Underground Storage Tanks (OUST) and the regulated community. EPA also slightly reduced the burden associated with notification requirements.

SUPPLEMENTARY INFORMATION:

A. Purpose

On February 19, 1998, a revised OMB Circular A-119, "Federal Participation in the Development and Use of Voluntary Consensus Standards and in Conformity Assessment Activities," was published in the **Federal Register** at 63 FR 8545, February 19, 1998. FAR Subparts 11.1 and 11.2 were revised and a solicitation provision was added at 52.211-7, Alternatives to Government-Unique Standards, to implement the requirements of the revised OMB circular. If an alternative standard is proposed, the offeror must furnish data and/or information regarding the alternative in sufficient detail for the Government to determine if it meets the Government's requirements. We believe the burden for FAR 52.211-7 to be negative, as it is purely a permissive means for offerors to propose reducing regulatory burden on a given solicitation. There are other places A-119 has an effect, though we believe these to be positive. One is by enabling the single process initiative. Another is the general replacement of Mil standards with commercial standards, e.g., ISO 9000. Also, A-119 is the basis for the language in FAR 53.105, which reduces the chaos in data standards development. The whole purpose of A-119 was to reduce regulatory burden by promoting the use of industry standards in lieu of federal ones.

To the extent that data on the annual frequency of the use of voluntary consensus standards under FAR 52.211-7 is not available, we believe 100 is reasonable. As an aside, FAR part 45 recognizes the use of voluntary consensus standards in the management

of Government property. However, in these cases there is no Government standard per se, with the voluntary consensus standard serving as the Government standard. Consequently, when under part 45 voluntary consensus standards are used, they are not an alternative to a Government standard under FAR 52.211-7.

B. Annual Reporting Burden

Respondents: 100.

Responses per Respondent: 1.

Total Responses: 100.

Hours per Response: 1.

Total Burden Hours: 100.

C. Public Comments

Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the FAR, and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

Obtaining Copies of Proposals:

Requesters may obtain a copy of the information collection documents from the General Services Administration, Regulatory Secretariat Division (MVCB), 1800 F Street NW., Washington, DC 20405, telephone 202-501-4755. Please cite OMB Control No. 9000-0153, OMB Circular A-119, in all correspondence.
