III. Further Information

The NRC seeks public comments on the proposed revision of Standard Review Plan (SRP) Sections 13.1.1, 13.1.2-13.1.3, 13.2.1, 13.2.2, 13.5.1.1, and 13.5.2.1. The changes to SRP Chapter 13 reflect the current staff reviews, methods and practices based on lessons learned from the NRC's reviews of design certification and combined license applications completed since the last revision of this chapter. The draft SRP sections, if finalized, would provide guidance to the staff for reviewing applications for a construction permit and an operating license under part 50 of Title 10 of the Code of Federal Regulations (10 CFR) with respect to conduct of operations. The draft SRP sections would also provide guidance for reviewing an

application for a standard design approval, a standard design certification, a combined license, and a manufacturing license under 10 CFR part 52 with respect to those same subject matters.

Following the NRC staff's evaluation of public comments, the NRC intends to finalize the revised SRP Sections 13.1.1, 13.1.2–13.1.3, 13.2.1, 13.2.2, 13.5.1.1, and 13.5.2.1 in ADAMS and post the revised sections on the NRC's public Web site at *http://www.nrc.gov/readingrm/doc-collections/nuregs/staff/sr0800/.* The SRP is guidance for the NRC staff. The SRP is not a substitute for the NRC's regulations, and compliance with the SRP is not required.

IV. Backfitting and Issue Finality

Issuance of the draft SRP sections, if finalized, would not constitute

backfitting as defined in 10 CFR 50.109 (the Backfit Rule) or otherwise be inconsistent with the issue finality provisions in 10 CFR part 52. The NRC's position is based upon the following considerations.

1. The draft SRP positions, if finalized, do not constitute backfitting, inasmuch as the SRP is internal guidance to NRC staff.

The SRP provides interim guidance to the staff on how to review an application for NRC regulatory approval in the form of licensing. Changes in internal staff guidance are not matters for which applicants or licensees are protected under 10 CFR 50.109 or issue finality provisions in 10 CFR part 52.

2. Backfitting and issue finality—with certain exceptions discussed below—do not protect current or future applicants.

Applicants and potential applicants are not, with certain exceptions, protected by either the Backfit Rule or any issue finality provisions under 10 CFR part 52. This is because neither the Backfit Rule nor the issue finality provisions under 10 CFR part 52-with certain exclusions discussed belowwas intended to apply to every NRC's action which substantially changes the expectations of current and future applicants. The exceptions to the general principle are applicable whenever an applicant references a 10 CFR part 52 license (e.g., an early site permit) and/or NRC regulatory approval (e.g., a design certification rule) with specified issue finality provisions. The staff does not, at this time, intend to impose the positions represented in the draft SRP sections (if finalized) in a manner that is inconsistent with any issue finality provisions. If, in the future, the staff seeks to impose a position in the draft SRP sections (if finalized) in a manner which does not provide issue finality as described in the applicable issue finality provision, then the staff must address the criteria for avoiding issue finality as described in the applicable issue finality provision.

3. The staff has no intention to impose the draft SRP positions on existing nuclear power plant licenses or regulatory approvals either now or in the future (absent a voluntary request for change from the licensee, holder of a regulatory approval, or a design certification applicant).

The staff does not intend to impose or apply the positions described in the draft SRP sections to existing (already issued) licenses (e.g., operating licenses and combined licenses) and regulatory approvals. Hence, the draft SRPs-even if considered guidance which is within the purview of the issue finality provisions in 10 CFR part 52-need not be evaluated as if it were a backfit or as being inconsistent with issue finality provisions. If, in the future, the staff seeks to impose a position in the draft SRPs (if finalized) on holders of already issued licenses in a manner which does not provide issue finality as described in the applicable issue finality provision, then the staff must make the showing as set forth in the Backfit Rule, or address the criteria for avoiding issue finality as described applicable issue finality provision, as applicable.

Dated at Rockville, Maryland, this 12th day of September, 2014.

For the Nuclear Regulatory Commission. Joseph Colaccino,

Chief, New Reactor Rulemaking and Guidance Branch, Division of Advanced Reactors and Rulemaking, Office of New Reactors.
