

the Part D subsidy for more than 12 months; or (3) if they reported a change in income, resources, or household size. Part D beneficiaries complete the SSA-1026-SCE when they need to report a potentially subsidy-changing event, including the following: (1) Marriage, (2) spousal separation, (3) divorce, (4)

annulment of a marriage, (5) spousal death, or (6) moving back in with one's spouse following a separation. The respondents are current recipients of the Medicare Part D low-income subsidy who will undergo an eligibility redetermination for one of the reasons mentioned above.

6. Electronic Records Express (Third Parties)—20 CFR 404.1700—404.1715—0960—0767. Electronic Records Express (ERE) is an online system which enables medical providers and various third party representatives to download and submit disability claimant information electronically to SSA as part of the disability application process. To ensure

only authorized people access ERE, SSA requires third parties to complete a unique registration process if they wish to use this system. This information collection request (ICR) includes the third-party registration process; the burden for submitting evidence to SSA is part of other, various ICRs. The respondents are third party

representatives of disability applicants or recipients who want to use ERE to electronically access clients' disability files online and submit information to SSA.

Type of Request: Revision of an OMB-approved information collection.

Modality of completion	Number of respondents	Frequency of response	Number of responses	Average burden per response (minutes)	Estimated total annual burden (hours)
ERE	12,000	281	(3,372,000)	1	56,200

7. Screen Pop—20 CFR 401.45—0960—0790. Section 205(a) of the Act requires SSA to verify the identity of individuals who request a record or information pertaining to themselves, and to establish procedures for disclosing personal information. SSA established Screen Pop, an automated telephone process, to increase speed of verification for such individuals. Accessing Screen Pop, callers enter their Social Security number (SSN) using

their telephone keypad or speech technology prior to speaking with a National 800 Number Network (N8NN) agent. The automated Screen Pop application collects the SSN and routes it to the "Start New Call" Customer Help and Information (CHIP) screen. Functionality for the Screen Pop application ends once the SSN connects to the CHIP screen and the SSN routes to the agent's screen. When the call connects to the N8NN agent, the agent

can use the SSN to access the caller's record as needed. The respondents for this collection are individuals who contact SSA's N8NN to speak with an agent.

Type of Request: Extension of an OMB-approved information collection.

Note: SSA incorrectly published this information collection as a revision on July 23, 2014, at 79 FR 42863. As we are not making any revisions to this collection, this is an extension of an OMB-approved information collection.

Modality of completion	Number of responses	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)
Screen Pop	55,600,0000	1	1	926,667
