

4. US Application No. 12/177,012, filed July 21, 2008 and issued as US patent 8,216,788 on July 10, 2012 [HHS Ref. No E-109-2007/1-US-02];

5. US Application No. 13/489,321, filed June 5, 2012 [E-109-2007/1-US-04];

6. US Application No. 14/263,703, filed April 28, 2014 [E-109-2007/1-US-011]

The patent rights in these inventions have been assigned to the United States of America.

The prospective exclusive licensed territory may be worldwide and the field of use may be limited to in vitro diagnostics of prion-associated diseases requiring FDA premarket approval, or the equivalent thereof outside of the United States, and USDA licensed veterinary diagnostics, or the equivalents thereof outside of the United States.

**DATES:** Only written comments and/or application for a license that are received by the NIH Office of Technology Transfer on or before 11:59 p.m. Eastern Time on December 19, 2014 will be considered.

**ADDRESSES:** Requests for a copy of the patents and applications, inquiries, comments and other materials relating to the contemplated license should be directed to: Tedd Fenn, Senior Licensing and Patenting Manager, Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, MD 20852-3804; Email: [fennea@mail.nih.gov](mailto:fennea@mail.nih.gov); Telephone: 424-297-0336; Facsimile: 301-402-0220.

**SUPPLEMENTARY INFORMATION:** The invention relates to methods and compositions for the detection of infectious prions and diagnosis of prion related diseases. Currently, available tests for disease-causing prions are incapable of detecting low concentrations and must be confirmed post-mortem. This technology enables rapid and economical detection of sub-lethal concentrations of prions by using recombinant protein (rPrP-sen) as a marker. A seeded sample polymerizes rPrP-sen, which is detected as an amplified indicator of prions in the sample. This assay does not require multiple amplification cycles unless a higher degree of sensitivity is required. This technology potentially may be combined with additional prion-detection technologies to further improve the sensitivity of the assay.

The prospective exclusive license will be royalty bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR Part 404. The prospective exclusive license may be

granted unless within thirty (30) days from the date of this published notice, the NIH receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR Part 404.

Any additional applications for a license in the field of use, filed in response to this notice, will be treated as objections to the grant of the contemplated exclusive license. Comments and objections submitted to this notice will not be made available for public inspection and, to the extent permitted by law, will not be released under the Freedom of Information Act, 5 U.S.C. 552.

Dated: November 10, 2014.

#### National Heart, Lung, and Blood Institute; Notice of Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of a meeting of the National Heart, Lung, and Blood Advisory Council.

The meeting will be open to the public as indicated below, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

**Name of Committee:** National Heart, Lung, and Blood Advisory Council.

**Date:** February 10, 2015.

**Open:** 8:00 a.m. to 1:00 p.m.

**Agenda:** To discuss program policies and issues, including the Asthma Guidelines Needs Assessment Report. This report can be found at <http://www.nhlbi.nih.gov/health/resources/lung/nhlbiac-asthma-report.htm> and comments may be submitted to [Asthma\\_Needs\\_Assessment\\_Comments@nhlbi.nih.gov](mailto:Asthma_Needs_Assessment_Comments@nhlbi.nih.gov) by January 5, 2015.

*Place:* National Institutes of Health, Building 31, 6th Floor, C-Wing, 31 Center Drive, Bethesda, MD 20892.

*Closed:* 1:00 p.m. to 5:00 p.m.
