

- ii. The need to track and reconcile actual costs?
- iii. Other savings?
- d. Does your State, Tribe, or jurisdiction reconcile actual costs for both small and large projects regardless of Federal requirements?
- e. What is the average amount of time spent on reconciling (if applicable and assuming the subgrantee is not requesting a net small project overrun) and closing a project, considering project amounts near the previous and current maximum thresholds, for example:
 - i. Between \$40,000 and \$68,500?
 - ii. Between \$68,500 and \$120,000?
 - iii. Between \$120,000 and \$200,000?
- f. Will there be a reduction in the number of final site inspections for projects between \$68,500 and \$120,000?
- g. What is the average amount of time spent on a final site inspection for a project between \$68,500 and \$120,000?
- h. If the increased maximum threshold would decrease the number of final site inspections, will that create grantee and/or subgrantees cost savings on transportation, lodging, per diem, travel time and other associated final inspection costs? If so, what are the estimated savings?
- i. Are there impacts to other processes and/or savings generated by the change in the maximum threshold for the grantees and/or subgrantees? If so, what are these impacts and savings?
- j. Will the maximum threshold change cause challenges to the grantees and subgrantees? If available, please provide any solutions to the identified challenges.
- k. What processes does your State, Tribe or jurisdiction have in place to alleviate waste, fraud and abuse?
- l. As a grantee, does your State, Tribe, or jurisdiction perform audits on small projects? If so, can you estimate how much it costs to complete the audit?
- m. Does your State, Tribe, or jurisdiction foresee or plan to change your policies, procedures, laws, or regulations in response to the new maximum threshold? For example:
 - i. Grantee/subgrantee cost shares for large or small projects (if so, can you estimate how much or by what percentage change)?
 - ii. Reconciliation for large or small projects?
 - iii. Audits for large or small projects?
 - iv. Additional consolidation of work on small projects?
- 2. How will the change to the minimum threshold impact your State, Tribe, jurisdiction, or community? For example, please consider how it might impact the administrative costs of processing grants, the timeliness of

receiving recovery funds, and the ability to ensure proper use of Public Assistance grant funding. Please provide data to support your statement, if available.

a. How many projects between \$1,000 and \$3,000 would be consolidated into a single project worksheet over \$3,000 based on a logical grouping of work (which is the current standard)? If not many, why?

b. Are there obstacles to project consolidation that FEMA needs to consider? If so, please provide solutions to the identified obstacles.

c. Is there a way to track the number of projects that will be consolidated? Would your State, Tribe, jurisdiction, or community be willing to submit data to support an estimate of the number of consolidated projects and/or participate in a survey to collect data?

d. Is there a way to track the number of projects that did not meet the minimum threshold and will not be consolidated? Would your State, Tribe, jurisdiction, or community be willing to submit data to support an estimate of the number of consolidated project and/or participate in a survey to collect data?

e. Will greater consolidation of projects based on a logical grouping of work under the minimum threshold save time in the closeout of a small project? For example, will closing one consolidated project worksheet save time compared to closing three separate project worksheets?

f. Does your State, Tribe, or jurisdiction foresee or plan to change your policies, procedures, laws, or regulations in response to the new minimum threshold? For example:

i. Training and policies for project consolidation and logical grouping.

ii. Change to disaster assistance minimum thresholds in your State, Tribe, or jurisdiction, if applicable.

3. Do you have other comments or recommendations related to this subject that you would like to share for FEMA's consideration?
