2013, requesting that the EPA object to the proposed CAA title V operating permit for Gateway issued by the BAAQMD, identified as Major Facility Review Permit, Facility #B8143. The Petitioner alleged that the permit was not consistent with CAA title V requirements because the EPA failed to obtain incidental take authorization and take other actions under the Endangered Species Act for "listed species affected by" the facility. The BAAQMD issued a final title V permit for Gateway on October 30, 2013.

On October 15, 2014, the EPA Administrator issued an Order denying the title V petition for Gateway. The Order explains EPA's rationale for denying the petition.

SwRI researchers will present technical work completed under the direction of EPA and NHTSA to assist in developing Phase 2 mediumand heavy-duty GHG and fuel efficiency standards.

This technical work includes testing conducted over-the-road and on heavyduty chassis dynamometers, powertrain test cells, and engine test cells. This work has been conducted to advance test procedure development and validate refinements that agencies have been considering for the greenhouse gas emissions model (GEM) used for heavyduty vehicle certification. Aerodynamic tractor testing via both coast-down and constant-speed test procedures will also be presented, in addition to results from recent heavy-duty engine and vehicle technology modeling. SwRI will also describe simulation studies to look at the potential fuel saving performance of

numerous MD/HD engine and vehicle technologies.

This workshop will not include discussion of policy considerations such as Phase 2 program stringency or program structure. Rather, this workshop is an opportunity for interested stakeholders and individuals to learn more about recent EPA and NHTSA sponsored technical research, to engage directly with the SwRI researchers who have been conducting this work, and to provide initial feedback on work conducted to date.
