- (i) Access to facilities, including whether each licensee will have unrestrained access to the shared transmission facilities;
- (ii) Operation, maintenance, repair, and modification of facilities, including a list of all relevant equipment, a description of each party's financial obligations, and any relevant notice provisions; and
- (iii) Termination or transfer/ assignment of rights to the shared licenses, including the ability of a new licensee to assume the existing CSA.
- (2) Channel sharing agreements submitted under this section must include a provision affirming compliance with the channel sharing requirements in this section including a provision requiring that each channel sharing licensee shall retain spectrum usage rights adequate to ensure a sufficient amount of the shared channel capacity to allow it to provide at least one Standard Definition (SD) program stream at all times.
- (e) Termination and assignment/ transfer of shared channel. If a channel sharing station's license authorized under this section is terminated, the remaining channel sharing station or stations will continue to have rights to their portion(s) of the shared channel. The license(s) of the remaining channel sharing station(s) shall be modified to reflect that its channel is no longer shared with the terminated licensee. Synopsis

I. Introduction and Background

- 1. In this Further Notice of Proposed Rulemaking, we seek comment on whether to retain the "personal use" restriction for Provider-Specific Consumer Signal Boosters.
- 2. The Commission released the Signal Boosters NPRM on April 6, 2011, whereby it proposed rules to facilitate the development and deployment of well-designed signal boosters. On February 20, 2013, in the Signal Boosters Report and Order (Report and Order), the Commission adopted the new regulatory framework to allow consumers to realize the benefits of using signal boosters while preventing, controlling, and, if necessary, resolving interference to wireless networks. In the Report and Order, the Commission

adopted new technical, operational, and registration requirements for signal boosters. The new rules created two classes of signal boosters—Consumer and Industrial—with distinct regulatory requirements for each.

II. Further Notice of Proposed Rulemaking

- 3. The underlying purpose of the Report and Order was to broaden the availability of signal boosters while ensuring that these boosters do not adversely affect wireless networks. In the concurrently adopted Order on Reconsideration, we adopted rule amendments that advance this goal by making Provider-Specific Consumer Signal Booster safer to wireless networks. Consistent with that purpose, we now consider whether to further expand consumer access to signal boosters. We therefore seek comment on whether to remove the "personal use" restriction on the operation of Provider-Specific Consumer Signal Boosters.
- 4. To facilitate broader access to signal boosters, in the Report and Order, we developed a streamlined process for authorizing Consumer Signal Boosters by requiring consumers to obtain the consent of their wireless carrier and register their Consumer Signal Booster with that carrier. We found that this licensing framework would best facilitate the rapid introduction of Consumer Signal Boosters while enabling wireless operators to maintain sufficient control of their networks. By incorporating the restriction that Consumer Signal Boosters may be operated only for "personal use," we also made it possible for consumers to seek consent from and register their devices only with the wireless carrier to which they subscribe. This restriction is particularly relevant for Wideband Consumer Signal Boosters, as they are capable of operating on spectrum licensed to multiple wireless providers.
- 5. With Provider-Specific Consumer Signal Boosters, however, we question whether this "personal use" restriction remains necessary, as the device operates only on a single provider's spectrum. Because the consumer will have obtained consent from and registered with that single carrier, any transmissions from the Signal Booster are therefore authorized.
- 6. We therefore ask whether we should eliminate the "personal use" restriction for Provider-Specific Consumer Signal Boosters (but not for Wideband Consumer Signal Boosters). Would removing this restriction for Provider-Specific Consumer Signal Boosters be in the public interest? What are the costs and benefits of removing

the restriction? What are the costs and benefits of maintaining the restriction?

III. Procedural Matters

- A. Paperwork Reduction Act
- 7. The Further Notice of Proposed Rulemaking does not contain new or modified information collection requirements subject to the Paperwork Reduction Act of 1995 (PRA). Therefore the Further Notice of Proposed Rulemaking does not contain any new or modified information collection burdens for small businesses with fewer than 25 employees, pursuant to the Small Business Paperwork Relief Act of 2002.
- B. Regulatory Flexibility Analysis
- 8. The Regulatory Flexibility Act (RFA) requires that an agency prepare a regulatory flexibility analysis for notice and comment rulemakings, unless the agency certifies that "the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities."
- 9. We hereby certify that the Further Notice of Proposed Rulemaking will not have a significant economic impact on a substantial number of small entities. The Commission will send a copy of the Further Notice of Proposed Rulemaking, including this certification, to the Chief Counsel for Advocacy of the Small Business Administration.

C. Ex Parte Presentations

10. Permit-But-Disclose. We will continue to treat this proceeding as a "permit-but-disclose" proceeding in accordance with the Commission's ex parte rules. Persons making ex parte presentations must file a copy of any written presentation or a memorandum summarizing any oral presentation within two business days after the presentation (unless a different deadline applicable to the Sunshine period applies). Persons making oral ex parte presentations are reminded that memoranda summarizing the presentation must (1) list all persons attending or otherwise participating in the meeting at which the ex parte presentation was made, and (2) summarize all data presented and arguments made during the presentation. If the presentation consisted in whole or in part of the presentation of data or arguments already reflected in the presenter's written comments, memoranda or other filings in the proceeding, the presenter may provide citations to such data or arguments in his or her prior comments, memoranda, or other filings (specifying the relevant page and/or paragraph

numbers where such data or arguments can be found) in lieu of summarizing them in the memorandum. Documents shown or given to Commission staff during ex parte meetings are deemed to be written ex parte presentations and must be filed consistent with rule § 1.1206(b). In proceedings governed by rule § 1.49(f) or for which the Commission has made available a method of electronic filing, written ex parte presentations and memoranda summarizing oral ex parte presentations, and all attachments thereto, must be filed through the electronic comment filing system available for that proceeding, and must be filed in their native format (e.g., .doc, .xml, .ppt, searchable .pdf). Participants in this proceeding should familiarize themselves with the Commission's ex parte rules.

IV. Ordering Clauses

- 11. Accordingly, it is ordered that, pursuant to the authority of sections 1, 4(i), 7, 10, 201, 202, 208, 214, 301, 302, 303, 308, 309(j), 310, and 710 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154(i), 157, 160, 201, 202, 208, 214, 301, 302a, 303, 308, 309(j), 310, and 610, and §§ 1.412, 1.425, and 1.429 of the Commission's rules, 47 CFR 1.412, 1.425, 1.429, the Further Notice of Proposed Rulemaking is hereby adopted.
