

the proposed action, alternatives with equal or greater environmental impact were not evaluated. As an alternative to the proposed action, the NRC staff considered denial of the requested exemption, which would require unloading and reloading the affected MPC as described above. Denying the exemption would result in an increase in radiological exposure to workers, a small increase in the potential for radioactive releases to the environment due to radioactive material handling accidents, and increased cost to the licensee. Therefore, the NRC staff has determined that approving the proposed action has a lesser environmental impact than the alternative.

Agencies and Persons Consulted: The environmental assessment associated with this exemption request was sent to Mr. Bernard Bevil Chief of the Radiation Control Section in the Arkansas Department of Health, by letter dated November 10, 2014. A response, which was received by electronic mail dated November 21, 2014 (ADAMS Accession No. ML14328A287), states that the Arkansas Department of Health has no concerns. The NRC staff has determined that a consultation under Section 7 of the Endangered Species Act is not required because the proposed action will not affect listed species or a critical habitat. The NRC staff has also determined that the proposed action is not a type of activity having the potential to cause effects on historic properties. Therefore, no consultation is required under Section 106 of the National Historic Preservation Act.

III. Finding of No Significant Impact

The environmental impacts of the proposed action have been reviewed in accordance with the requirements set forth in 10 CFR part 51. Based upon the foregoing Environmental Assessment, the Commission finds that the proposed action of granting an exemption from the requirements of 10 CFR 72.212(a)(2), 10 CFR 72.212(b)(3), 10 CFR 72.212(b)(5)(i), and the portion of 10 CFR 72.212(b)(11) that states the licensee shall comply with the terms, conditions, and specifications of the CoC, and from 10 CFR 72.214 in order to allow Entergy to store spent fuel assemblies in MPC-24-060 in the as-loaded configuration at the ISFSI associated with ANO, Units 1 and 2, will not significantly impact the quality of the human environment. Accordingly, the Commission has determined that an environmental impact statement for the proposed exemption is not warranted and that a

finding of no significant impact is appropriate.
