(PBHCI) Program. Specifically, SAMHSA is requesting approval to only collect information on grantee quarterly reports.

The purpose of the PBHCI grant program is to improve the overall wellness and physical health status of people with serious mental illnesses (SMI), including individuals with co-occurring substance use disorders, by supporting communities to coordinate and integrate primary care services into publicly-funded community mental health and other community-based behavioral health settings. The program's goal is to improve the physical health status of adults with serious mental illnesses (and those with co-occurring substance use disorders) who have or are at risk for co-occurring primary care conditions and chronic diseases. The program's objective is to support the triple aim of improving the health of those with SMI; enhancing the client's experience of care (including quality, access, and reliability); and reducing/controlling the per capita cost of care.

New questions added to the quarterly report will include information on the selected evidence based practices (EBPs) for nutrition and tobacco cessation (including the number of participants and their outcomes), identifying the selected blood pressure treatment protocol (one of four recommended by the Centers for Disease Control and Prevention), and updating the chart on the identified sub-population(s) on physical health indicators in the disparities impact statement section of the quarterly report.

This information collection is needed to provide SAMHSA with sufficient information to monitor grantee performance and to assess whether integrated primary care services produce improvements in the physical health of the SMI population receiving services from community-based behavioral health agencies.

Collection of the information included in this request is authorized by Section 505 of the Public Health Service Act (42 U.S.C. 290aa–4)—Data Collection. Authorization for the PBHCI program is provided under Section 5604 of H.R. 3590, the Affordable Care Act (ACA), which authorizes SAMHSA to provide awards for the co-location of primary and specialty care in community-based mental health settings.

The table below reflects the annualized hourly burden.

Instrument	Number of respondents	Responses per respondent	Total responses	Hours per response per respondent	Total hour burden
