

elements of conservation design to help us identify priority conservation areas that will contribute to achieving measurable conservation targets such as population objectives. The policy ensures that when employees propose new refuges or expansions to existing refuges, they analyze and describe: (1) The project's vulnerability to climate change and other non-climate stressors (e.g., habitat fragmentation, invasive species), (2) how we will mitigate stressors to ensure the project's resiliency, (3) how the project is arranged in a geographically efficient manner to safeguard ecological processes across the landscape, and (4) how the project complements the resiliency of other conservation areas.

The policy establishes the process for sending project proposals to the Service Director and the potential outcomes of the Director's review. It also describes how designated representatives at the local level—Refuge Managers—must interact, coordinate, cooperate, and collaborate with State fish and wildlife agencies in the acquisition and management of refuges.

Summary of Comments and Changes to the Final Policy

On January 30, 2014, we announced the draft policy and requested public comment via a **Federal Register** notice (79 FR 4952). The comment period was open from January 30, 2014, through March 3, 2014. We received 35 detailed comment letters and many individual comments on the draft policy. In total, we received 236 individual comments, which were grouped into 71 comment categories. The comments were from nongovernmental organizations, individuals, States, and industry. Most of the comments expressed general support, and many addressed specific elements in the draft policy.

We considered all of the recommendations for improvement and clarification included in the comments and made appropriate changes to the draft policy. Many of the comments we received were outside the scope of this policy. We drafted this policy in a way that gives us flexibility as funding levels and resources change. The policy does not supersede any piece of legislation, regulation, or other policy.

Director, Fish and Wildlife Service.

SUPPLEMENTARY INFORMATION: The Tribe has submitted an application to the BIA requesting that approximately 2.4 acres of land be transferred from fee to trust status (Proposed Action), upon which the Tribe would renovate an existing bowling alley to convert it into a gaming

facility. In order for the Department to fully consider and either grant or deny the Tribe's application, the Department must first comply with NEPA.

The proposed fee-to-trust property is located within the incorporated boundaries of the City of Medford, Oregon, adjacent to the northeastern boundary of Highway 99, between Charlotte Ann Lane and Lowry Lane. The Proposed Action encompasses the various federal approvals which may be required to implement the Tribe's proposed economic development project, including approval of the Tribe's fee-to-trust application. The EIS will identify and evaluate issues related to these approvals.

Areas of environmental concern identified for analysis in the EIS include land resources; water resources; air quality; noise; biological resources; cultural/historical/archaeological resources; resource use patterns; traffic and transportation; public health and safety; hazardous materials and hazardous wastes; public services and utilities; socioeconomic; environmental justice; visual resources/aesthetics; and cumulative, indirect, and growth-inducing effects. Off-Road Vehicle Management Plan, Final Environmental Impact Statement, Lake Meredith National Recreation Area, Texas

AGENCY: National Park Service, Interior.

ACTION: Notice of availability.

SUMMARY: The National Park Service (NPS) announces the availability of a Final Environmental Impact Statement (FEIS) for the Off-Road Vehicle Management Plan (Plan), Lake Meredith National Recreation Area, Texas. The Plan/FEIS evaluates the impacts of four alternatives that address off-road vehicle (ORV) management in the national recreation area.

DATES: The NPS will execute a Record of Decision (ROD) no sooner than 30 days following publication by the

Environmental Protection Agency of its Notice of Availability of the Final Environmental Impact Statement.

ADDRESSES: The Plan/FEIS is available in electronic format online at: <http://parkplanning.nps.gov/LAMR>. Hard copies of the Plan/FEIS are available at Lake Meredith National Recreation Area, Alibates Flint Quarries National Monument Offices, 419 E. Broadway, Fritch, Texas 79036–1460, by phone at 806–857–3151.

FOR FURTHER INFORMATION CONTACT: Robert Maguire, Superintendent, Lake Meredith National Recreation Area, Alibates Flint Quarries National Monument, P.O. Box 1460, Fritch, Texas 79036–1460, by phone at 806–857–3151, or by email at Robert_Maguire@nps.gov.

SUPPLEMENTARY INFORMATION: The Plan/FEIS responds to, and incorporates agency and public comments received on the Draft Environment Impact Statement (DEIS) and Plan, which was available for public review from January 25, 2013, to March 26, 2013. Public meetings were held on March 19 and 20, 2013, to gather input on the EIS and Plan. Over 116 pieces of correspondence were received during the public review period. Agency and public comments and NPS responses are provided in Appendix B of the FEIS/Plan.

The purpose of this Plan/FEIS is to manage ORV use in the national recreation area for visitor enjoyment and recreation opportunities, while minimizing and correcting damage to resources. By special regulation (Title 36, Section 7.57 of the Code of Federal Regulations), the national recreation area allows the use of ORVs in two areas: Blue Creek and Rosita Flats. The Plan/FEIS evaluates four alternatives to manage ORV use in the national recreation area: a No Action Alternative (A) and three Action Alternatives (B, C, and D (preferred)). When approved, the Plan will guide the management of ORV use for the next 15–20 years.

Alternative A: No Action—The national recreation area would continue to operate under the 2007 Interim ORV Management Plan where ORVs are allowed below the 3,000 foot elevation line in Rosita Flats and from cutbank to cutbank at Blue Creek. Limited facilities are supplied. No additional management tools such as zoning, permits, or use limits would be implemented.

Alternative B: Under this alternative, ORV use would be managed through a zone system. Uses would be separated into the following zones: camping, hunting, resource protection, low speed, and beginner. At Rosita Flats, two areas
