If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

Any person may, within 60 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention. Any person filing to intervene or the Commission's staff may, pursuant to section 157.205 of the Commission's Regulations under the Natural Gas Act (NGA) (18 CFR 157.205) file a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the NGA.

The Commission strongly encourages electronic filings of comments, protests, and interventions via the internet in lieu of paper. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site (www.ferc.gov) under the "e-Filing" link.

Annual Cost Burden: \$2,400.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: In general, there is no need for confidentiality with this collection of information. The Commission, however, will allow filing entities to seek confidential treatment of their data.

Needs and Uses: The Federal Communications Commission (Commission) is requesting that the Office of Management and Budget (OMB) approve a revision of OMB Control No. 3060-1156. The purpose of the revision is to obtain OMB approval of the annual reporting requirements stipulated under 47 CFR 43.62 which requires that entities providing international services file annual circuit capacity reports and annual traffic and revenue reports, in a format set out in a Filing Manual.

Upon the OMB's approval of the proposed changes in this information collection, the Commission plans to eliminate two existing information collections from the Commission's inventory, OMB Control Number 3060-0106 (47 CFR 43.61 annual traffic and revenue reports) and OMB Control Number 3060-0572 (47 CFR 43.82 annual circuit-status reports).

In order for carriers to comply with annual reporting requirements stipulated in 47 CFR 43.62, the Commission is developing a web-based system for filers to submit their reports. Filers will access the filing system via

a portal on the FCC Web site, www.FCC.gov. The software for the web-based system is now under development and the Commission is seeking final OMB approval for the new requirements in 47 CFR 43.62, the new consolidated Filing Manual and the electronic filing of the data.

Without this collection of information, the Commission would not be able to ensure compliance with its international rules and policies. Furthermore, the Commission would not have sufficient information to take measures to prevent anticompetitive conduct in the provision of international communications services. The Commission would not have adequate information to respond to failures in the U.S.-international market. The Commission would not be able to promote effective competition in the global market for communications services. The lack of effective competition would adversely affect the U.S. revenues in the telecommunications industry. The agency would not be able to comply with the international regulations stated in the World Trade Organization (WTO) Basic Telecom Agreement. Carriers and other entities outside the Commission, such as other government agencies, international organizations, and academia, use the information to analyze industry trends. Other government agencies use the information in merger analyses and negotiations with foreign countries. If the information collection was not conducted, carriers, government agencies and other entities would not have accurate industry data available in order to conduct analyses.

Federal Communications Commission.

Secretary, Office of the Secretary, Office of the Managing Director.
