RIN 3206-AN16

Federal Employees' Retirement System; Present Value Conversion Factors for Spouses of Deceased Separated Employees

AGENCY: Office of Personnel Management. ACTION: Final rule.

SUMMARY: The Office of Personnel Management (OPM) is adopting its proposed rule to revise the table of reduction factors for early commencing dates of survivor annuities for spouses of separated employees who die before the date on which they would be eligible for unreduced deferred annuities. This rule is necessary to ensure that the tables conform to the economic and demographic assumptions adopted by the Board of Actuaries and published in the **Federal Register** on March 20, 2015.

DATES: Effective October 1, 2015.

FOR FURTHER INFORMATION CONTACT: Roxann Johnson, (202) 606–0299.

SUPPLEMENTARY INFORMATION: On March 20, 2015, OPM published at 80 FR 15036, a notice in the Federal Register to revise the normal cost percentages under the Federal Employees' Retirement System (FERS) Act of 1986, Public Law 99-335, 100 Stat. 514, as amended, based on economic assumptions and demographic factors adopted by the Board of Actuaries of the Civil Service Retirement System. Under 5 U.S.C. 8461(i), the demographic factors and economic assumptions require corresponding changes in factors used to produce actuarially equivalence when required by the FERS Act. As a result, on April 3, 2015, at 80 FR 18159, OPM published a proposed rule in the

Federal Register to revise the table of reduction factors in Appendix A to subpart C of part 843, Code of Federal Regulations, for early commencing dates of survivor annuities for spouses of separated employees who die before the date on which they would be eligible for unreduced deferred annuities. OPM received no written comments on the proposed rule.

Executive Order 12866, Regulatory Review

This rule has been reviewed by the Office of Management and Budget in accordance with Executive Order (E.O.) 12866, as amended by E.O. 13258 and E.O. 13422.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because the regulation will only affect retirement payments to surviving current and former spouses of former employees and Members who separated from Federal service with title to a deferred annuity.

RIN 1904-AD19

Energy Conservation Program: Test Procedures for Packaged Terminal Air Conditioners and Packaged Terminal Heat Pumps

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Final rule.

SUMMARY: On March 13, 2014, the U.S. Department of Energy (DOE) issued a notice of proposed rulemaking (NOPR) to amend the test procedures for packaged terminal air conditioners (PTACs) and packaged terminal heat pumps (PTHPs). That NOPR serves as the basis for this final rule regarding the test method for PTACs and PTHPs. The amendments adopted here do not affect measured energy use. These changes incorporate by reference certain sections of the latest versions of industry test

procedures AHRI Standard 310/380-2014, ANSI/ASHRAE Standard 16–1983 (RA 2014), ANSI/ASHRAE Standard 37-2009, and ANSI/ASHRAE Standard 58-1986 (RA 2014), and specify additional testing provisions that must be followed including an optional break-in period, require that cooling capacity tests be conducted using electricity measuring instruments accurate to +/-0.5% of reading, explicitly require that wall sleeves be sealed, allow for the prefilling of the condensate drain pan, and require testing with 14-inch deep wall sleeves and the filter option most representative of a typical installation.

DATES: The effective date of this rule is July 30, 2015. The final rule changes will be mandatory for representations starting June 24, 2016. The incorporation by reference of certain publications listed in this rule was approved by the Director of the Federal Register as of July 30, 2015.
