SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. Abstract: Respondents are owners and operators of pesticides active ingredient production operations. Respondents must submit one-time reports of initial compliance and either semiannual reports or quarterly reports of compliance. Recordkeeping of parameters related to process and air pollution control technologies is required. The reports and records will be used to demonstrate compliance with the standards.

Form Numbers: None.

Respondents/affected entities: Owners and operators of pesticides active ingredient production operations.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart MMM).

Estimated number of respondents: 18 (total).

Frequency of response: Initially, quarterly, and semiannually.

Total estimated burden: 12,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$1,416,000 (per year), includes \$236,000 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an adjustment decrease in the number of responses because this ICR removes leak detection and repair (LDAR) reports. The regulation requires subject sources to include LDAR information in periodic (*i.e.* semiannual or quarterly) reports. LDAR is not separately reported to EPA; therefore, no additional

responses are associated with this activity.

Acting Director, Collection Strategies Division.

Total Annual Burden: 37,977 hours.

Total Annual Cost: \$7,318,100.

Privacy Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Needs and Uses: The FCC adopted a Report and Order, FCC 15-47, that establishes rules for commercial use of 150 megahertz in the 3550-3700 MHz (3.5 GHz) band and created a new Citizens Broadband Radio Service, on April 17, 2015, published at 80 FR 36163 (June 23, 2015). The order creates a Spectrum Access System (SAS), an online database that will manage and coordinate frequency use in the band through registration and other technical information. The Commission seeks approval from the Office of Management and Budget (OMB) for the information collection requirements contained in FCC 15-47. The SAS will use the information to assign frequencies, manage interference, and authorize spectrum use. The Commission will use the information to authorize the SAS Administrator(s) and ESC operator(s).

The following is a description of the information collection requirements for which the Commission seeks OMB approval:

Section 96.17(d) requires that FSS Earth Station licensees register annually with the SAS to receive interference protection.

Section 96.21(a)(3) requires that existing commercial wireless broadband licensees operating in the band register in order to receive interference protection.

Sections 96.23(b); 96.33(b); 96.39(a)(1) and (c)–(e); 96.43(b); 96.45(d) require that the Citizens Broadband Radio Services Devices (CBSDs), which will operate on the Citizens Broadband Radio Service, must be registered with an SAS before use, provide specified information to the SAS, and adhere to certain operating parameters.

Section 96.35(e) requires that users operating Category B CBSDs must coordinate among each other and resolve interference through technological solutions or other agreements.

Sections 96.39(a) and (b) require that CBSDs report their geographic coordinates to an SAS automatically through the device or by a professional installer.

Sections 96.39(f) and (g) require that CBSDs incorporate sufficient security measures so that they are only able to communicate with the SAS and approved users and devices.

Section 96.41(d)(1) requires that licensees must report the use of an alternative Received Signal Strength Limit (RSSL) to the SAS.

Section 96.51 requires that manufacturers include a statement of compliance with the Commission's Radio Frequency (RF) safety rules with equipment authorization applications.

Sections 96.57(a)–(c); 96.59(a); 96.61 require that the SAS be capable of receiving registration and technical information from CBSDs, SASs, and ESCs, as well as employ secure communication protocols.

Section 96.63 requires that SAS Administrator applicants must demonstrate to the Commission that they are qualified to manage an SAS.

Section 96.67 requires that an Environmental Sensing Capability (ESC), used to protect federal radar systems from interference, may only operate after receiving Commission approval and be able to communicate information about the presence of a federal system and maintain security of the detected signals.

These rules which contain information collection requirements are designed to provide for flexible use of this spectrum, while managing three tiers of users in the band, and create a low-cost entry point for a wide array of users. The rules will encourage

innovation and investment in mobile broadband use in this spectrum while protecting incumbent users. Without this information, the Commission would not be able to carry out its statutory responsibilities.

Federal Communications Commission.

Federal Register Liaison Officer, Office of the Secretary.
