The RDEIR/SDEIS will also analyze the impacts for two additional new alternatives: Alternative 2D, which will consist of a water conveyance facility with five intakes, and Alternative 5A, which will consist of a water conveyance facility with one intake. Both of these alternatives will contain the habitat protection and restoration measures necessary to minimize or avoid project effects, and the previously described Conservation Measures listed above. In addition, the RDEIR/SDEIS will describe and analyze project modifications and refinement of the resource area analyses, alternatives, and actions. Reclamation will be the Federal lead agency and NMFS, USFWS, and the U.S. Army Corps of Engineers, by virtue of their regulatory review requirements, will be cooperating agencies for the RDEIR/SDEIS. All other entities identified as Cooperating Agencies through prior agreements will retain their status for the RDEIR/SDEIS.

Council on Environmental Quality regulations for implementing NEPA (40 CFR 1502.9(c)) do not require any additional scoping for a supplement to a Draft EIS, and the lead agencies are not proposing any scoping process for this RDEIR/SDEIS in addition to the scoping that has already been done for the EIR/EIS as described above.

For further background information, see the December 13, 2013, **Federal Register** notice (78 FR 75939).

(iii) identify like or directly competitive articles that complainant, its licensees, or third parties make in the United States which could replace the subject articles if they were to be excluded;

(iv) indicate whether complainant, complainant's licensees, and/or third party suppliers have the capacity to replace the volume of articles potentially subject to the recommended exclusion order and/or a cease and desist order within a commercially reasonable time; and

(v) explain how the limited exclusion order and cease and desist order would impact consumers in the United States.
