SUPPLEMENTARY INFORMATION:

Introduction

The Federal pipeline safety regulations (49 CFR part 192 Subpart O; 49 CFR § 195.452) requires operators to continually examine ways to reduce the threats to pipelines in order to minimize the likelihood of a release, and ways to reduce the consequences of potential releases. A primary tool to implement this process is generally referred to as a “risk analysis” or “risk assessment.”

To support integrity management requirements, a risk analysis modeling approach must be able to adequately characterize all pipeline integrity threats and consequences concurrently, and the impact of measures to reduce risk must be evaluated.

This workshop will focus on advancing risk modeling approaches by looking at risk modelling methodologies for pipeline and non-pipeline systems, and practical ways that operators can adopt and/or adapt them to the analyses of their systems.

Background

Subsequent to implementation of the integrity management rules, industry has adopted a variety of approaches to risk analysis. Many of these approaches are variations of the “risk index” models. Index models and other basic approaches to risk modeling have been implemented by industry for purposes such as risk-ranking pipeline segments to prioritize initial integrity management-required baseline assessments. Additional opportunities to utilize these approaches to do more investigative oriented analyses in order

to identify specific ways to reduce risks are being explored.

As summarized and discussed in past public forums and workshops on pipeline safety (e.g., *2014 Government/Industry Pipeline R&D Forum*), industry and PHMSA are in general agreement that risk models need to evolve in such a way as to be more investigative in nature.

PHMSA believes that improving risk models is important for further reducing the risk of pipelines to the public health and safety. In particular, PHMSA is interested in specific ways to advance pipeline risk models, and in practical ways that operators can adopt and/or adapt risk models to the analyses of their systems.

Issued in Washington, DC, on August 10, 2015, under authority delegated in 49 CFR 1.97.

Deputy Associate Administrator for Field Operations.

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[Docket No. FD 35945]

Regional Rail Holdings, LLC— Acquisition of Control Exemption— Regional Rail, LLC

AGENCY: Surface Transportation Board, DOT.

ACTION: Correction to notice of exemption.

On July 22, 2015, Regional Rail Holdings, LLC, a noncarrier, filed a verified notice of exemption under 49 CFR 1180.2(d)(2) to acquire control of Regional Rail, LLC, a holding company for three Class III rail carriers, East Penn Railroad, LLC, Middletown & New Jersey Railroad, LLC, and Tyburn Railroad LLC.

On August 7, 2015, notice of the exemption was served and published in the **Federal Register** (80 FR 47557). The notice erroneously stated that the effective date of the exemption would be August 22, 2015, and that petitions to stay must be filed no later than August 15, 2015. This notice corrects those statements. The effective date of the exemption is August 21, 2015, and petitions to stay must be filed no later than August 14, 2015. All other information in the notice is correct.

Board decisions and notices are available on our Web site at www.stb.dot.gov.

Decided: August 10, 2015.

By the Board, Rachel D. Campbell,
Director, Office of Proceedings.

Kenyatta Clay,
Clearance Clerk.
