DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP15–137–000]

Rockies Express Pipeline LLC; Notice of Availability of the Environmental Assessment for the Proposed Zone 3 Capacity Enhancement Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for the Zone 3 Capacity Enhancement Project, proposed by Rockies Express Pipeline LLC (REX) in the above-referenced docket. REX requests authorization to construct and operate natural gas compression facilities in Fayette, Pickaway, Muskingum, and Warren Counties, Ohio and Decatur County, Indiana. The REX Zone 3 Capacity Enhancement Project would provide an

additional 800 million cubic feet per day of east-to-west transportation service.

The EA assesses the potential environmental effects of the construction and operation of the Zone 3 Capacity Enhancement Project in accordance with the requirements of the National Environmental Policy Act. The FERC staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The proposed REX Zone 3 Capacity Enhancement Project includes the following facilities:

- One new 49,428 horsepower (hp) compressor station in Pickaway County, Ohio (Columbus Compressor Station);
- one new 31,791 hp compressor station in Fayette County, Ohio (Washington Court House Compressor Station);
- one new 37,038 hp compressor station in Decatur County, Indiana (St. Paul Compressor Station);
- an additional 38,400 hp of compression, gas cooling facilities, and a new power and control building at the existing Chandlersville Compressor Station in Muskingum County, Ohio; and
- gas cooling facilities and a new power and control building at the existing Hamilton Compressor Station in Warren County, Ohio.

The FERC staff mailed copies of the EA to federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American tribes; potentially affected landowners and other interested individuals and groups; newspapers and libraries in the project area; and parties to this proceeding. In addition, the EA is available for public viewing on the FERC's Web site (www.ferc.gov) using the eLibrary link. A limited number of copies of the EA are available for distribution and public inspection at: Federal Energy Regulatory Commission, Public Reference Room, 888 First Street NE., Room 2A, Washington, DC 20426, (202) 502–8371.

Any person wishing to comment on the EA may do so. Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. The more specific your comments, the more useful they will be. To ensure that the Commission has the opportunity to consider your comments prior to making its decision on this project, it is important that we receive your
