Army permit application to perform certain building activities on and near the ESP site.

The draft ESP EIS contained a finding of no adverse effect to historic properties for the NRC's Section 106 NHPA review. The NJ HPO concurred with this finding. By letter dated December 4, 2014, the NRC received a revised opinion letter from the NJ HPO finding that the proposed project would result in an adverse effect to historic properties (ADAMS Accession No. ML15005A040). The NJ HPO stated that the visual intrusion of two new natural draft cooling towers, which are included in the plant parameter envelope for the ESP application, would, if selected in a subsequent application to construct and operate a nuclear plant at the ESP site, result in an adverse effect to historic properties. The NRC met with the NJ HPO, PSEG representatives, and interested members of the public on January 9, 2015, in Salem County, New Jersey to discuss the NJ HPO's concerns. Between January and August 2015, the NRC met with the NJ HPO, ACHP, NPS, interested members of the public, and PSEG several times to discuss the effects from the proposed project on historic properties and to develop possible mitigation strategies for any potential effects. Between January and August 2015, the NRC conducted seven publicly noticed consultation meetings and teleconferences, pursuant to Section 106 of the NHPA.

Based on the information from these meetings and additional research, the NRC issued letters on June 24, 2015, to NJ HPO, ACHP, and NPS stating its determination that natural draft cooling towers, if selected, would result in an indirect visual adverse effect on the Abel and Mary Nicholson House National Historic Landmark (127 Fort Elfsborg-Hancock Bridge Road), the property at 349 Fort Elfsborg-Hancock Bridge Road, and the property at 116 Mason Point Road. These properties are within an area the NJ HPO has determined is an NRHP-eligible historic district. In its letter, the NRC stated its intention to develop a MOA to resolve the adverse effect to these three properties.

The draft MOA addresses the potential indirect adverse visual effect from construction and operation of natural draft cooling towers as analyzed in the ESP EIS and would conclude NHPA Section 106 consultation for the ESP. The draft MOA provides a framework for consultation at the combined license or construction permit/operating license stage.

I. Request for Public Comment

The NRC is requesting public comment on the draft MOA. The NRC does not plan to provide individual responses to comments. However, the NRC will consider any comments received when finalizing the MOA and will publish the final MOA in the **Federal Register**. The draft MOA is available in ADAMS under Accession No. ML15239B244.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Director. Office of Nuclear Reactor Regulation, has issued a director's decision (ADAMS Accession No. ML15162A763) on a petition filed by the petitioners on March, 18, 2013 (ADAMS Accession No. ML13079A022). The petition was supplemented by letters dated April 23, May 7, June 28, July 22, October 16, November 13, November 27, and December 2, 2013, October 20, 2014, and January 27, 2015 (ADAMS Accession Nos. ML13133A161, ML13135A001, ML13184A109, ML13205A251, ML13294A400, ML13335A002, ML14016A361, ML15027A458, ML15027A462, and ML15039A011, respectively).

The petitioners requested that the NRC take enforcement action to: (1) Suspend operations at FitzPatrick and Vermont Yankee; (2) investigate whether Entergy Nuclear Operations, Inc, (ENO, the licensee) possesses sufficient funds to cease operations and decommission FitzPatrick and Vermont Yankee, per section 50.75 of Title 10 of the *Code of Federal Regulations* (10 CFR), "Reporting and recordkeeping for decommissioning planning"; and (3) investigate ENO's current financial qualifications per 10 CFR 50.33(f)(5) to determine whether remains qualified to continue operating Pilgrim.

As the basis of the request, the petitioners asserted that ENO no longer meets the financial qualifications requirements to possess the licenses and operate FitzPatrick, Pilgrim, and Vermont Yankee in accordance with 10 CFR 50.33(f)(2) and 10 CFR 50.80(b)(1)(i).

On May 7, 2013, the petitioners met with the NRC's Petition Review Board (PRB). The meeting provided the petitioners and the licensee an opportunity to provide additional information and to clarify issues cited in the petition. The transcript for that meeting is available in ADAMS under Accession No. ML13135A001.

By letter dated August 7, 2013 (ADAMS Accession No. ML13154A313), the NRC informed the petitioners that their request for immediate actions to suspend operations at FitzPatrick and Vermont Yankee was denied. In the same letter, the NRC also informed the petitioners of the PRB's final recommendation to accept the petition for review, because it met the criteria in Management Directive 8.11, Section III.C, "Criteria for Reviewing Petitions Under 10 CFR 2.206."

The NRC sent a copy of the proposed director's decision to the petitioners and the licensee for comment on March 27, 2015 (ADAMS Accession Nos. ML15040A159 and ML15040A140, respectively). The petitioners and the licensee were asked to provide comments within 30 days on any part of the proposed director's decision that was considered to be erroneous or any issues in the petition that were not addressed. Comments were received and are addressed in the attachments to the final director's decision.

The Director of the Office of Nuclear Reactor Regulation denied the petitioners' request for the following actions:

(1) Suspend operations at FitzPatrick and Vermont Yankee.

(2) Investigate whether ENO possesses sufficient funds to cease operations and decommission FitzPatrick and Vermont Yankee, per 10 CFR 50.75.

(3) Investigate ENO's current financial qualifications per 10 CFR 50.33(f)(5) to determine whether the licensee remains qualified to continue operating Pilgrim, be granted.

The reasons for these decisions are explained in the director's decision (DD-15-08) pursuant to 10 CFR 2.206 of the Commission's regulations.

The NRC will file a copy of the director's decision with the Secretary of the Commission for the Commission's review in accordance with 10 CFR 2.206. As provided by this regulation, the director's decision will constitute the final action of the Commission 25 days after the date of the decision unless the Commission, on its own motion, institutes a review of the director's decision in that time.

Dated at Rockville, Maryland, this 27th day of August, 2015.

For the Nuclear Regulatory Commission. Michele G. Evans,

Deputy Director, Office of Nuclear Reactor Regulation.
