those eligible based on classification by potential duration categories, and those exhausting their full entitlement as classified by actual duration categories. These data are used by the National Office in solvency studies, cost estimating and modeling, and assessment of state benefit formulas.

#### SUPPLEMENTARY INFORMATION:

##### I. Background

The Worker Profiling and Reemployment Services (WPRS) program allows for the targeting of reemployment services to those most in need of services. The ETA 9048 and ETA 9049 are the only means of tracking the activities in the WPRS program. The ETA 9048 report describes flows of claimants at various points in the WPRS system from initial profiling through the completion of specific reemployment services. The ETA 9049 describes the reemployment experience of profiled claimants who were referred to services by examining the state's existing wage record files to see in which quarter the individuals who received reemployment services became employed, what wages they earned, and whether they changed industries.
