Information Collection Request Title: Prevention Communication Formative Research—Revision—OMB No. 0990-0281—Office of Disease Prevention and Health Promotion.

Abstract: The Office of Disease Prevention and Health Promotion's (ODPHP) focus includes developing and disseminating prevention information to the public. Changes in this request include updated national hourly wage and minor changes to data collection activities and related burden hours in order to meet the needs of the initiatives mentioned below. This request builds on previous formative research approaches to place more emphasis on Web-based data collection to allow

greater geographical diversity among respondents, to decrease respondent burden, and to save government costs. As a federal government agency, ODPHP strives to be responsive to the needs of America's diverse audiences while simultaneously serving all Americans across a range of channels. To carry out its prevention information efforts, ODPHP is committed to conducting formative and usability research to provide guidance on the development and implementation of its disease prevention and health promotion communication and education efforts. This generic clearance request describes data collection activities involving methods such as: Individual interviews, focus groups, Web-based surveys, card sorting and various forms of usability testing to establish a deeper understanding of the interests and needs

of consumers and health professionals for disease prevention and health promotion information and tools.

The information collected will be used by ODPHP to improve its communication, products, and services that support key office activities including: Healthy People, Dietary Guidelines for Americans, Physical Activity Guidelines for Americans, healthfinder.gov, and increasing health care quality and patient safety. ODPHP communicates through its Web sites (www.healthfinder.gov, www.HealthyPeople.gov, www.health.gov) and through other channels including social media, print materials, interactive training modules, and reports.

Likely Respondents: Respondents are likely to be either consumers or health professionals.
