

she answers survey questions, reads survey materials, or completes other activities as part of a survey process. A number of different techniques may be involved, including asking respondents what specific words or phrases mean, and asking respondents probing questions to determine how they estimate or calculate specific data elements on a survey form. The objective of these interviews is to identify problems of ambiguity or misunderstanding, to identify other difficulties respondents have answering questions, reduce measurement error in a survey, and assess the burden for reporting energy information.

Usability Interviews. Usability interviews are similar to cognitive interviews in which a respondent is typically asked to “think aloud” or asked “retrospective questions” as he or she reviews an electronic questionnaire, Web site and/or associated materials, or hard copy form. The objective of a usability interview is to make sure that respondents can easily and intuitively navigate electronic questionnaires, Web sites and other associated materials, or other survey instruments.

Focus Groups. Focus groups involve group sessions guided by a moderator who follows a topic guide containing questions or topics focused on a particular issue rather than adhering to a standardized questionnaire. Focus groups are useful for surfacing and exploring issues with populations of interest, e.g., a specific group of stakeholders.

(5) *Annual Estimated Number of Respondents:* 2,000;

(6) *Annual Estimated Number of Total Responses:* 2,000;

(7) *Annual Estimated Number of Burden Hours:* 2,000;

(8) *Annual Estimated Reporting and Recordkeeping Cost Burden:* There are no additional costs associated with these survey methods other than the burden hours. The information is maintained in the normal course of business. The cost of burden hours to the respondents is estimated to be \$143,940 (2,000 burden hours times \$71.97 per hour), which represents a reduction of 1,006 burden hours from the prior renewal of this collection. Therefore, other than the cost of burden hours, EIA estimates that there are no additional costs for generating, maintaining and providing the information.
