A March 22, 2016 draft of the WRAP may be downloaded at <http://www.st.nmfs.noaa.gov/ecosystems/climate/rap/western-regional-action-plan>. The WRAP is being developed to increase the production, delivery, and use of climate-related information and will identify priority needs and specific actions to implement the NOAA Fisheries Climate Science Strategy in the region over the next five years. Based on the webinar discussion, the EWG may submit a written report with its comments for the Pacific Council's June 23-28, 2016 meeting in Tacoma, WA. The EWG will also discuss progress on completing the Coordinated Ecosystem Indicator Review Initiative and plan future activities. This initiative is an opportunity for the larger Pacific Council family to discuss the Annual State of the California Current Ecosystem Report's indicator categories, what indicators should be part of the annual report, and how they interface with Council-managed fisheries to better support the Council's ecosystem-based management policies.

Although nonemergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of

SUPPLEMENTARY INFORMATION: ONMS serves as the trustee for a network of underwater parks encompassing more than 170,000 square miles of marine and Great Lakes waters from Washington state to the Florida Keys, and from Lake Huron to American Samoa. The network includes a system of 13 national marine sanctuaries and Papahānaumokuākea and Rose Atoll marine national monuments. National marine sanctuaries protect our nation's most vital coastal and marine natural and cultural resources, and through active research, management, and public engagement, sustain healthy environments that are the foundation for thriving communities and stable economies. One of the many ways ONMS ensures public participation in the designation and management of national marine sanctuaries is through the formation of advisory councils. National marine sanctuary advisory councils are community-based advisory groups established to provide advice and recommendations to the superintendents of the national marine sanctuaries and Papahānaumokuākea Marine National Monument on issues including management, science, service, and stewardship; and to serve as liaisons between their constituents in the community and the sanctuary. Additional information on ONMS and its advisory councils can be found at <http://sanctuaries.noaa.gov>. Materials related to the purpose, policies, and operational requirements for advisory councils can be found in the charter for a particular advisory council (http://sanctuaries.noaa.gov/management/ac/council_charters.html) and the *National Marine Sanctuary Advisory Council Implementation Handbook* (<http://sanctuaries.noaa.gov/management/ac/acref.html>).
