

Taxpayers must maintain sufficient records to show the original cost of the property and to support the tax treatment of the property transfer reported on the taxpayers' returns. Taxpayers must keep these records as long as they may be needed for the administration of any provision of the Code. Generally, this means records that support items shown on a return must be retained until the period of limitations for that return expires. See section 6501 of the Code. A copy of any section 83(b) election made with respect to property must be kept until the period of limitations expires for any return with respect to which the income inclusion or basis of the property is relevant.

Applicability Date

These regulations apply to property transferred on or after January 1, 2016. For transfers of property on or after January 1, 2015 and prior to January 1, 2016, the preamble to the proposed regulations provides that taxpayers may rely on the guidance in the proposed regulations (which is identical to the guidance contained in these final regulations).

Effect on Other Documents

Rev. Proc. 2012–29 (IRB 2012–28, 49) states that a taxpayer making a section 83(b) election must submit a copy of the election with his or her tax return for the taxable year in which such property was transferred. Effective as of July 26, 2016, Rev. Proc. 2012–29 is revoked, in part, to the extent it requires, inconsistent with these final regulations, a taxpayer to submit a copy of a section 83(b) election with his or her income tax return.

Statement of Availability of IRS Documents

Rev. Proc. 2012–29 is published in the Internal Revenue Bulletin (or Cumulative Bulletin) and is available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or by visiting the IRS Web site at <http://www.irs.gov>.

Special Analyses

Certain IRS regulations, including this one, are exempt from the requirements of Executive Order 12866, as supplemented and reaffirmed by Executive Order 13563. Therefore, a regulatory impact assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations, and because the regulations do not impose a collection of information on small

entities, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Pursuant to section 7805(f) of the Code, these regulations have been submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Drafting Information

The principal authors of these final regulations are Thomas Scholz and Michael Hughes, Office of the Associate Chief Counsel (Tax Exempt and Government Entities). However, other personnel from the IRS and the Treasury participated in their development.

29 CFR Parts 1910, 1915, and 1926

[Docket No. OSHA–2010–0034]

RIN 1218–AB70

Occupational Exposure to Respirable Crystalline Silica; Approval of Collections of Information

AGENCY: Occupational Safety and Health Administration (OSHA), Department of Labor.

ACTION: Final rule; Office of Management and Budget's (OMB) approval of collections of information.

SUMMARY: This rule is a technical amendment announcing that OMB has approved the collections of information contained in OSHA's standards for Occupational Exposure to Respirable Crystalline Silica and revising OSHA's regulations to reflect that approval. The OMB approval number is 1218–0266.

DATES: Effective July 26, 2016.

FOR FURTHER INFORMATION CONTACT: Todd Owen, OSHA, Directorate of Standards and Guidance, Room N–3609, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210; telephone (202) 693–2222.

SUPPLEMENTARY INFORMATION: OSHA published a final rule for the Occupational Exposure to Respirable Crystalline Silica standards on March 25, 2016 (81 FR 16286), after determining that employees exposed to respirable crystalline silica at the previous permissible exposure limits face a significant risk of material impairment to their health. The evidence in the record for this rulemaking indicates that workers exposed to respirable crystalline silica are at increased risk of developing silicosis and other nonmalignant respiratory diseases, lung cancer, and kidney disease. These requirements are necessary to provide protection from these hazards. The silica final rule becomes effective on June 23, 2016. Start-up dates for specific provisions are set in § 1910.1053(l) for general industry and maritime and in § 1926.1153(k) for construction.

Consistent with the Paperwork Reduction Act (PRA) (44 U.S.C. 3501–3520), the **Federal Register** notice for the Occupational Exposure to Respirable Crystalline Silica final rule states that employers do not have to comply with the collections of information until OMB approves those collections of information and the

Department of Labor publishes a notice in the **Federal Register** announcing this approval and the control number assigned by OMB to the final rule's collections of information. Under 5 CFR 1320.5(b), an agency may not conduct or sponsor a collection of information unless: (1) The collection of information displays a current valid OMB control number and (2) the agency informs members of the public required to respond to the collection of information that they are not required to do so unless the agency displays a currently valid OMB control number for the collection of information.

On March 25, 2016, the Department of Labor submitted an information collection request for the final rule to OMB for approval in accordance with

the PRA. On June 27, 2016, OMB approved the collections of information contained in the final rule and assigned these collections of information OMB Control Number 1218–0266, titled “Respirable Crystalline Silica Standards for General Industry, Shipyard Employment and Marine Terminals (29 CFR 1910.1053) and Construction (29 CFR 1926.1053).” The approval for collecting the information expires on June 30, 2019.

This revision of § 1910.8, § 1915.8 and § 1926.5 is a technical amendment to increase public awareness of OMB's approval of the collections of information. Opportunity for public comment on this rule is therefore unnecessary. The Agency notes that the public has already had the opportunity

to comment on the collections of information and OMB has approved them.

The final Occupational Exposure to Respirable Crystalline Silica standards impose new collections of information for purposes of the PRA. The collections of information in the rule are needed to assist employers in identifying and controlling exposures to respirable crystalline silica in the workplace, and to address adverse health effects related to respirable crystalline silica. OSHA will also use records developed in response to these standards to determine compliance with OSHA standards.

The table below identifies the new collections of information contained in the final rule.
